RAJASTHAN HOMOEOPATHY ASSOCIATION, (Regd.)
NEW COLONY, JAIPUR (Rajasthan)

The inexperienced must be assisted and instructed in order to practice Homoeopathy without resort to traditional medicine. But assistance can be of use only when desired and appreciated.

To acquire the knowledge necessary to conduct a practice without resort to doubtful methods demands arduous toil and constant application, while the mind is held in receptive attitude and the longing of the heart is for truth because it leads to what is good and not to sell it for a price.

SOME MORE MESSAGES & APPRECIATIONS.

"Organisers and the Management of the Torch of Homoeopathy have an honoured place in Homoeopathic Society as well as the community. I am sure this publication will be an invaluable addition to the present homoeopathic reporters, I mean Journals and be able to inspire its readers with spirit of Service which our country so badly needs to-day".

Dated 12th May, 1959. —Dr. Rampratap Verma, Compiler, All India Homoeopathic Medical Directory & Who is Who,
P.O. Kanech, Ludhiana,

× × ×

Thank you for the complimentary copy of the 'TORCH of Homoeopathy'. The finest thing that struck me was the excellent get up of good printing without any spelling mistakes which we usually find in Indian Journals. Besides, standard and well-instructing articles make your Journal a grand success throughout. Wish the Journal a long life.

Dated 13-4-59. —Dr. N. Srinivasan, M.D.H.,F.N.F.U., Homoeopath,
17, Usman Road, Madras--17.

× × ×

I am very grateful for receiving the complimentary copy of April issue of the Torch of Homoeopathy. It is really a very good Journal of Homoeopathy. Its standard very high, printing very impressive. I congratulate the publisher for the service of Homoeopathy.

I pray for its success,

Dated 9-4-59. —Dr, Alimuddin Ansari, H.M.D.,M.D.B.I,
Udhopura, BANARAS.

× × ×

We wish to thank you for the complimentary copy of your Journal, which is very interesting and attractive.

We should like very much to receive the issues of your Journal on an exchange basis with the Journal of the American Institute of Homoeopathy, provided this will be agreeable to you,

Dated 11-3-59. —Ira M. Sunnens, Business Manager,,
Philadelphia 3, Pa. American Institute of Homoeopathy,

THE
TORCH OF HOMŒOPATHY

Vol. I July 1959 No. 3

EDITORIAL

It is indeed very encouraging to see that Homoeopathy is fast gaining ground and striking wide spread roots in all corners of the world with unprecedented enthusiastic activities. Although the progress and popularity of Homoeopathy has been quite spontaneous since the early days of its birth in the conjuncture of the 18th and 19th century we find the pace of its popularity more galloping and faster during the last 10 years.

More and more members of the public including a larger number of rich men, influential administrative authorities, and even larger number of Ayurvedic and Allopathic practitioners are being convinced of the superior merits of Homoeopathy as a science of therapeutics for healing the ailments of human body & mind.

More and more students are now interested in the study of Homoeopathy and are taking up the practice of Homoeopathy as a career inspite of little promise of financial gains. But alas! our national govt. is still not rising to the cry of the mass and need of the hour. For want of regular teaching institutions the candidates are preparing themselves with a working knowledge of Homoeopathy through self-study and quite a few of them indeed achieve high standard of efficiency.

But yet as long as the Govt. is not providing enough Homoeopathic Colleges and Hospitals, it is the moral duty and responsibility of the existing Homoeopaths who have received the blessings of Hahnemann, to educate the public with the Homoeopathic outlook and to train more and more students to carry the TORCH of Homoeopathy.

The efforts of many individual practitioners and many Homoeopathic Associations are indeed very commendable for the services rendered by them in various ways inspite of their handicaps of limited means.

During the last 10 years the number of Homoeopathic practitioners of all towns of India has increased about 4 times to what it was in 1949 and naturally the number of patients receiving the blessings of Homoeopathic treatment has also increased hundred folds.

Although the merits of Homoeopathy is primarily responsible for this fast progress and popularity; the oppositions from the other schools has also lent some impetus. Besides, the toxic effects of the various synthetic and proprietory patent medicines of Allopathy have driven quite a large number of patients to seek Homoeopathic treatment. The narrowing scope of allopathic treatments inspite of new discoveries like Sulpha drugs, Antibiotics, Cortisone, various Vitamins, Virus Vaccines, Glandular therapy, X'Rays, mechanical aids, surgical manipulations; anti-allergy aids, etc. which are not free from various risks and resulting complications, is obliging the patients to seek Homoeopathic treatment.

During the last 10 years numbers of Homoeopathic Associations have been formed in various towns, cities, districts, provinces, and even on All India basis and International sphere including the World Congress. Several scores new magazines on Homoeopathy have also made their appearance during the last ten years and all are contributing their mite to the cause of Homoeopathy, rather say, to the cause of serving humanity. All this is indeed very encouraging and commendable. No doubt. The world can now hear the throbbing pulse of Homoeopathy and perhaps Hahnemann himself enlivened back through his birthday celebrations everywhere on the 10th of April every year. Hahnemann is now living in the heart and soul of every Homoeopathic physician and all disciples of Homoeopathy.

Although all these numerous Homoeopathic Associations are equally enthusiastic and interested in the sole cause of progress, prosperity and popularity of Homoeopathy, there are differences in their mode of thinking, outlook and approach to the subject. We do not blame any body for this because individual thinkers must always have differences in their thoughts and approach. But it pains us to see that some are unnecessarily antagonistic to others. It would have been a great show and success, a great source of power, prestige and influence, if

all the Homoeopaths and all the Homoeopathic Associations could unite and organise themselves on an united front on a single platform and under a single banner.

The major point of difference in outlook and in approach is that while some wants to narrow the scope of the Associations by making it open to some selected and successful Homoeopaths only under a fake designation of qualified Homoeopaths, some others allow a little more liberal scope of embracing all Homoeopath practitioners, regular, wholetime professional, or part time practitioners or even laymen practitioners; the remaining others however, want to embrace and unite all practitioners, irrespective of cast, creed, status, standard and even laymen sympathisers and lovers of Homoeopathy, whosoever may be interested in popularising the superior merits of Homoeopathy and achieving the deserved status for the same.

As we believe that the science of Homoeopathy is primarily a science of healing which concerns all and as we believe that professional vested interest should not infilterate the ranks of Homoeopathic Practitioners we subscribe to the later approach and wish to gather all the strength of all interested in the cause of Homoeopathy in anyway, and thus raise an equivocal voice from the public and the profession together so that the Govt. may not ignore our demands any longer.

And yet for the very reason of our broader and liberal outlook we do not for the sake of the difference in approach; vie with any individual or Association having a narrow and less liberal outlook and approach. We do not even mind if more and more associations spring up and do their bit until it is possible for all to unite and **we do pledge our whole hearted support with all our best wishes and sincerest co-operation to all individuals and Associations in all matters and at all times, without any pride or prejudice.**

We shall however continue to appeal to all to broaden their outlook and embrace all interested in the common cause. And in doing so we appeal to all brother Homoeopaths to keep in view every mile stone in the past journey of Homoeopathy during the last 160 years of its progress that brought us to learn Homoeopathy and derive benefit from the knowledge of Homoeopathy.

We believe, it would be easier to be liberal in views and to broaden the outlook and approach if we remember the contributions of lay practitioners like Babu Rajendra Lal Dutt (who was responsible for the conversion of Dr. Mahendra Lal Sarkar), Pt. Ishwar Chandra Vidyasagar, Father Muller, Rai Bahadur Bishambhardas, and many others less known or unknown silent workers and selfless servants of Homoeopathy who are severally and jointly responsible for carrying the beams of Homoeopathy to you and to me and to all who are to-day proud of being called a Homoeopath. We have also to draw the attention of all to the nasty games of the old school and the stepmotherly attitude of the Health Ministry under the influence of the allopathic officers; who are out to strangle the progress of true and pure Homoeopathy by recommending it for post graduate study only. All the Homoeopaths should therefore realise the impending peril under the prevailing situation of the Govt. attitude and try to collect all strength and support from all shades of practitioners and believers in Homoeopathy. In this connection we also invite and request all to read the oft-quoted speeches of Dr. L. B. Nigam of Kanpur, Dr. N. M. Jaisoorya M.D., of Hyderabad, Dr. C. Oomen M.B., B.S., (Retd. IMS.) of Calicut and others who are our leaders in this period.

We must ignore what little harm a few quacks might have done, in the face of enormous spontaneous service rendered by a multitude of so called unqualified lay practitioners.

We must also bear in mind the great services of many a public Homoeopathic Associations, as compared to the achievements of a few practitioners Associations. To name a few, it would be useful to see the activities of the Madras Presidency Homoeopathic Association, the Grace Medical Mission, the Homoeopathic Society of Bombay (with which the Homoeopathic Practitioners' Association is merged since 1-4-58) and many others.

Once again, we however pledge our whole-hearted support and sincere co-operation to all individuals and Associations interested in the cause of Homoeopathy.

Jai Hind ! Jai Homoeopathy ! Jai Hahnemann !

HYSTERIA*

By A. Zweig, M.D.

Aconitum 10x is of importance not only on account of its influence on vasomotility but also as to its moods of fear and anxiety leading to great restlessness.

Agaricus muscarius 6x to 30x causes jerkings and ecstatic conditions with inclination to ryhthmic or passionate motions and similar mental behaviour. From intense excitability small causes lead to serious reactions and grave excitation. The jerkings and twitchings may be local or general and often the patient has tonic symptoms with opisthotonus.

Ammonium carb 4x It causes weak circulation with fainting. Tearful moods, but also irritability; is easily offended.

Angustura 4x It has local spastic symptoms of respiratory organs (larynx and pharynx.)

Apis 6x to 30x Must be considered because it has great, anxious restlessness, even delirious conditions, becomes weak, has congestions, fainting, exciting dreams, talking in sleep. There is severe pressing headaches, stupefaction and vertigo; spastic jerking of eyelids and extremities; chest oppression, eructations; nausea and vomiting. It is especially related to ovarian symptoms.

Aquilegia 4x Clavus and globus hysterias with copious vomiting; insomnia; sensation of trembling with dull pain in ovarian region.

Argentum nitricum 6x to 30x It acts strongly on brain and spinal cord (pressure in head to migraine with temporary blindness, vertigo, tremors, paralysis, convulsions, disturbed co-ordination), but there are also stomach symptoms, meteorism, ovarian pain; sensation of enlargement of affected parts. Patient reacts strongly to mental emotions.

Asafoetida 4x to 12x Indicated on account of general and local symptoms. There are globus hysteria and pharyngeal spasms, or also general spasms; bloating of stomach and intestines, at times with foul or rancid tasting eructations; clavus-like pressure on top of head. Disposition changes quickly.

---

*Translated by S.W.S. from Nervenkrankheiten.

All Potencies are the lowest recommended and in decimal scale.

Functions of body and mind change incalculably. Eliminations are often disturbed.

Asarum europeum 4x Very sensitive to noise; nervous exhaustion and nervous chills are prominent.

Aurum metallicum 10x Aside from disturbed circulation (congestion to heart and female sexual organs), depressed mood with suicidal thoughts and actions, often from self-accusation, are observed.

Baptisia tinctoria 4x Spasms of oesophagus and heart.

Bufo 10x It acts on excited sexual organs, not only in masturbation but also in convulsion, attacks with aura pointing to these organs, or which occur during or following sexual acts.

Calcarea carbonica 4x to 30x Is especially useful on account of its constitutional relation to scrofula. It is often indicated where there are heat on top of head, moist hands and feet, in menstrual disturbances and in convulsions. Sleep may be very poor with exciting visions, Calcarea phosphorica acts similarly.

Cannabis 4x Extreme psychic and sexual excitation to spastic or ecstatic conditions are prominent in this remedy. Urination may be disturbed by spasms.

Cantharis 4x is similar to the former. The symptoms on the part of the urinary and sexual organs are even more outstanding.

Castoreum 4x It is a remedy for nervous weakness, especially after exhausting causes. Spirit, soul and nerves are affected.

Caulophyllum 4x All symptoms, especially head ache and psychic disturbances, are aggravated before and during menstruation.

Chamomilla 4x to 30x Patient is very irritable, angry, reaching to bodily or mental events. There is inclination to jerkings and spasms followed by laming or numbness. The female generative phases, especially pregnancy and parturition, often demand this remedy. It is also very often suitable for children.

China 4x to 30x is frequently indicated in general symptoms of weakness and its results, but it has also special relation to stomach, intestines, circulation and composition of blood.

Cicuta virosa 6x It has clonic, but also very pronounced tonic, spasms during which the head is drawn backward, unconsciousness and between attacks head pressure.

Cimicifuga 4x is valuable on accont of its abundance of characteristic nervous symptoms: Bursting vortex pain, insomnia, great restlessness; moods change frequently, as also the bodily symptoms; depressed or anxious frame of mind; twitching and convulsions. All symptoms are related to the female organs, which themselves are not normal, and the complaints are dependent on the generative phases.

Cocculus 10x and 30x is also especially a female remedy with close relation to the spinal cord and brain on the one hand, and otherwise to the chest and abdominal organs. Patients complain of headache with sensation of hollowness and vertigo with trembling and paralyzed feeling. In general, this remedy has great inclination to exhaustion. Besides there may be general or local spasms especially of respiratory organs, pharynx, esophagus, stomach with vomiting, intestines (tympanic), and uterus. Menstruation with cramps, painful and very weakening, and yet relieving because, if retarted, all complaints are increased.

Coffea 10x Great mental and physical vivacity which causes insomnia, etc. Headache as from a nail driven in.

Conium maculatum 6x to 30x Depressed, dissatisfied mood; weakness and vertigo; sensation as from a rising ball. Female organs: Itching, stitches, downward pressure, menses weak, lacking, instead corroding leucorrhoea. Sexual dissatisfaction is supposed to play a role, perhaps also masturbation.

Crocus sativa 4x Frequent changes of temperament with prominent motor hysterical restlessness. Jerking of single muscle groups, chorea. Circulation increased (pulsating, congestions, uterine heamorrhages). Characteristic is the sensation of something alive in abdomen.

Cypripedium 4x Severe mental hyper-irritation and exhaustion with insomnia.

Gelsemium 6x to 30x Aside from congestions to head with migraine, and to heart, the paralyzing character (eyes, pharynx, larynx, bladder) is pronounced.

Gratiola 4x Spasmodic intestinal symptoms with bloating.

Hyoscyamus 4x to 30x causes severe excitation with mental symptoms, especially jealousy, which are often leading to exhaustion. Motor excitation or alternating with twitching, even local or general spasmodic affections. This may lead to delirium and attacking by-standers, indecent exposures and other actions of increased libido. During attack face is pale.

Ignatia 6x to 30x Depressed, introvert disposition; patient takes everything hard, often the result of grief and disappoin tment. However, this may change suddenly, and without reason to laughing, or convulsions, exalted screaming and dazed condition, or lead to them. Globus sensation, worse from eructation, is found as often as parietal pressure; also local spasms (cough, muscles of respiration, in eructation, stomach) are often seen. It is also indicated in paralysis.

Lachesis 10x to 30x Related to ovaries. The extreme sensitiveness to touch exists not only as to ovaries but also to neck with sensation of suffocation and of foreign body in throat. Great loquacity with rapid change of theme. Aside from dusturbed circulation which causes headache and oppression to heart, there in characteristic aggravation from sleep.

Magnesia muriatica 4x has reflex symptoms from stomach and intestines (violent eructations, waterbrash, nausea, diarrohea); pressure in head, tremors, fainting and aggravation from large meals and during menstruation; relief from eructation and pressure (headache).

Mephitis 4x to 10x has great exhaustion indicated in nervous excitation and convulsive conditions, loquacity, head pressure, restless sleep.

Moschus 4x to 12x Vasomotor disturbances (vertigo, chilly sensation in body, pale face, fainting, palpitation) are most prominent; there is also extreme nervous weakness, aimless activity. General spasms without loss of consciousness local spasms of larynx, respiratory muscles and intestines.

There may be semiconsciousness or loud delirium; hysterical laughing and crying. Increased libido.

Murex 4x has much increased sexual irritation in females. Nymphomania.

Natrum muriaticum 10x to 30x acts depressingly on brain, nerves and organs. Aside from a pale face and symptoms of

irritated weakness of heart and entire circulatory system (scanty menses) as well as of stomach, intestines and metabolism, we find mental symptoms (indecision, distraction, sadness which does not wish "to talk it over," which would make patient angry, and they have to be similarly evaluated.

Nux moschata 4x to 12x Here also weakness outweights not only the mentality as to comprehension, stability, producing not only strong variations of moods but also confusion which may lead to improper laughing, etc. Fainting happens easily and also distension after light meals. Constipation from intestinal paralysis occurs often. There may be tonic-colnic local or general spasms. Characteristic is sensation of great dryness of mouth. Often we notice reflex symptoms from the female sexual organs.

Nux Vomica 4x to 30x has especially irritable moods with congestions and disturbances in the organs of digestion (lack of appetite, pressing pain in stomach, constipation, haemorrhoids). One must pay attention to sexual irritations and their abuse, as also to wrong nutrition and mode of life.

Oleum animale 4x It acts on the autonomous system and has pulsating pressure in head; migraine; spasms or paralysis of vascular muscles; palpitation and fainting. Spastic contractive sensation (in chest).

Oxalic acid 10x Aggravation of complaints when thinking of them; weakness and headache. This remedy is directly related to the central nervous system.

Palladium 10x to 30x Patient is irritable, blunt and egoistical. Unpleasant sensation in region of uterus and ovaries. Pressure and pain across top of head from ear to ear. (Boericke.)

Phosphoric acid 3x A general remedy in nervous exhaustion with indifference and dejection; sleep poor, restless, especially after physical sickness or mental over-exertion, grief and care. Perspires easily.

Phosphorus 6x to 30x May at times be indicated on account of nervous and circulatory weakness as also by the total constitution.

Platina 10x to 30x It has changeable, but especilly haughty moods, also congestions to head, heart and female pelvic organs, with frequent, copious menses; also increased, but usually unsatisfied libido.

Pulsatilla 6x to 30x Tender, depressed mood, desiring sympathy. Venosity and general weakness affect circulation and state of blood, and is responsible for conditions of symptoms. Digestive and female organs are often especially affected.

Sabadilla 4x Aside from general nervous exhaustion there are spastic symptoms (constriction in throat as from a stuck bolus, or spastic sensation in chest, convulsive sneezing). Inclination to misinterpret symptoms, e.g., imagined pregnancy.

Scutelaria 4x It has many pointing symptoms; scaring excitement and irritability disturb sleep and increase to confusion; pressure in head to migraine; much eructation, swallowing, gagging, bloating in intestines, sense of oppression in chest; tremors and twitching often lead to reflex spasms.

Secale 6x to 10x is closely related to the female organs, especially at parturition and childbed period. But it also acts on the other involuntary muscles, especially of the vascular system which it contracts spastically. It furthermore can cause general tonic spasms with interrupted twitching, or even lead to paralysis.

Sepia 6x to 30x It is here seldom indicated constitutionally. It has the pale yellowish face, the despondent, scary moods, becoming irritable even from bagatelles. It has venous circulatory disturbances, especially in head (hemicrania), heart and uterus, stomach-intestinal symptoms and weakness, especially when sitting in bent-over position (needlework). It however acts also on the male sexual glands.

Stannum 6x to 30x Is prominently indicated by the sensation of extreme weakness from the least exertion, felt especially in the chest and back. It has crampy pains in stomach and uterus, slowly increasing and decreasing, not tolerating external pressure. Yellowish, weakening, vaginal discharge due to general exhaustion; prolapsus. The moods correspond to the great weakness, depressed, tearful.

Staphysagria 4x to 10x Anger, chronic worry and grief, but also sexual excesses play an important role. Hence, the patients are weak physically and nervous, but also very irritable. Every emotion aggravates. The metabolism is also disturbed as evidenced by inclination to skin affections and deposits of uric acid salts.

Sumbul 4x Moods change quickly, hysterical laughing, crying and pharyngeal spasm. Severe vasomotor excitement (palpitation and congestions) as also meteorism. Libido increased.

Tarantula hispania 6x to 30x Prominent in extreme restlessness, local in fingers and generally to choreic twitchings and and maniacal excitation Sensation of chilliness is usually complained of.

Valeriana 4x Severe reaction to every stimulus leads to headache, even from least exertion; fainting, exhaustion and syncope. Anxious, despairing mood corresponds to this weakness. Vasomotor disturbances in form of congestions, especially evenings, ascending from abdomen to chest, causing oppression, are as frequent as salivation and nausea and vomiting. The excitation may increase to convulsion only to lightning-like flashing through body.

Veratrum 4x Inclination to local and general spasms as well as collapse-like symptoms.

Viola odorata 4x Weepy moods without real cause; irritable, full of fear. Often there is oppressive sensation, breathing difficulty, palpitation and pressing headache.

Zincum metallicum 10x Inclination to muscles pasm or contraction, or only constant motion of legs: pressure at root of nose, all characteristic symptoms. Often suppressed discharges are causative. Insomnia is usually present.

Zizia (Thlaspium aureum) 4x Aside from the often changing moods, there is inclination to convulsive conditions of local or general nature. Pathological changes in female organs are often found.

Note:—We have however obtained good results from higher potencies also. There are several other remedies also which may prove equally useful in the cure of Hysteric ailments if chosen and applied on strictly Homoeopatic principles. —Ed.

HOMOEOPATHIC PHILOSOPHY & SPIRITUALISM

By

Dr. S. Kaushik, B.M.B.S.

(*The Calcutta Homoeopathic Medical College and Hospitals*).

Contd. from page 92, Vol. 1, No. 2 of —The Torch of Homoeopathy.

Previous reference :—"May it be, that we have to serve people of material taste but our glory lies, in the fact that we keep ourselves away, as far as possible from the materialism. It is the shallow water and the Homoeopathic prescriber is the lotus flower."

For bringing ourselves to this level, it is essential that we should develop the habit of :—

(1) External cleanliness.

(2) Internal purification.

This will give rise to the habit of concentration and ultimately, strengthning of will power. Once we begin to possess a strong will power, there remains for us to maintain it and to utilize it for the cause of man kind.

It is easy to say it while very difficult to do it. But it does not mean that it is impossible "where there is a will there is a way" and the word impossible is found in the dictionary of fools (Napolean Bonaparte). It is advisible that to acquire strong will power we should follow the path of "Slow and steady wins the race". To be more clear we mean to say that first of all and to start with we should develop the habit of external cleanliness. In the begining we should try to live neat, clean and tidy for some hours daily. Gradually, we should develop this habit to the extent that we may live up to the above standard for 24 hours of our routine life but this will only mean, pouring orange squash in a glass without ice, here the ice being the habit of punctuality, therefore slowly and steadily we prepare ourselves to be neat, clean, tidy and puncutal in all walks of our life.

It will not be out of way to mention here that my learned readers may get disheartened due to obstacles coming in their way but obstacles are to be cleared with firm determination, we should not give up on petty matters as we are destined to achieve the greatest of wisdom, the spiritual power and once we become capable of possessing a strong will power in us, we will feel as if we posses a magic wand in our hands. And then it will be completely under our command to apply the greatest

of formulae, "Simillia, Similibus Curentur" for the untold benefit of human kind. Although late Dr. Samuel Hahnemann has freely expressed that a true homoeopathic prescriber can cure one and all ailing symtoms of a human body except death, we can boastfully declare that the nature's great law of similar based on top of spiritual power can even control death.

We fear, we may start dealing this supreme important subject at this stage, which may prove to be too early, hence to revert to the point, neat, clean, tidy and punctual way of our routine life, will extend all help for the development of concentration on thoughts, nay concentration on good thoughts, here we should well understand that good thoughts mean, thoughts devoid of selfish motives, it is to be remembered that the rays of light travel star to star and the vibration of thoughts travel soul to soul.

Spiritual power and selfishness are two opposite things, the bright flame of spiritual power can be extinguished by the dirty water of selfishness. To do justice, with the profession, we have to say that medical profession should be in the plain of selfless service, to all living beings. In our beloved mother country it was the usual practice in the past and it was then a saintly profession, a selfless service and a noble work. The unforgetable founder of Homoeopathy himself lived a saintly life, devoted to his cause, imposing self-sacrifice on himself and on his dependents as well. It was not a meaningless step taken by him, rather it was his cherished goal towards the perfection of the profession. He achieved a lot in this direction and served lots of people by his achievements. He spared no pains in climbing to this higher plain of medical profession.

To come to the point, in this era of human habitation, it has more or so become the responsibility of the Government, to afford facilities, to the physicians of the greatest of the arts of healing, as per saying of the father of the nation, "Government must encourage and patronise it in our poor country.....Safer, more economical and the most complete medical science" MAHATMA GANDHI (Homoeopathic Mirror Calcutta July 1958.) It has become doubly necessary, because of the fact that the present Government in our blessed country, is of peoples, by the peoples and for the peoples. If needful is done, in this

connection, there can be no two opinions that there remains any better, cheaper and efficacious medical aid for the poor and needy classes and masses of this vast nation, than Homoeopathy. We further venture to say that the Homoeopathic prescriber, possessing spiritual power, will stand as top personality in the field of medical profession, why so ? The answer is simple, he will be without selfish motive. And this all we mean about INTERNAL PURIFICATION.

The so called, 'old but gold', proverb i.e. "Simple living and high thinking" will prove an asset to our aim of developing the aforsaid EXTERNAL CLEANLINESS and INTERNAL PURIFICATION. Homoeopathic system of medical science, is based on simplicity in all ways and manners, simple looking medicine, white tiny globules, should be kept far away from, fragrance, flavour, astringents and strong odour, also these things are prohibited, before and after the administration of Homoeopathic dose, it is very simple in appearance but very powerful, dynamically powerful, in its efficacy. It calls for "simple living and high thinking," naturally, the scholar of new school of thoughts, will get acquainted to these subtle thoughts, he will have the idea of simplicity by inheritance.

These external cleanliness and internal purification, are the stepping stones, for our high aim of achiveing spiritual power, we have mentioned above, as to how, Homoeopathic philosophy and spiritualism stand interrelated to each other. Therefore in a metaphorical term, a Homoeopathic prescriber, is a piece of raw diamond and its fine cutting and superfine polishing is the magic of spiritualism.

CURE WITHOUT DIAGNOSIS

By

Dr. Jyotirmaya Ghosh, M.A. (Cal.) Ph.D. (Edin.), F.N.I.

CURE without diagnosis may sound as a paradox, but it is a fact of experience. Usually the treatment of a patient consists in proper diagnosis, that is to say, determination of the pathological causes of the disease and then the application of proper drugs or surgical operation. But we do come across cases, for which proper diagnosis, in the accepted sense of the term, is either impossible or impracticable. These cases are ordinarily regarded as hopeless, but according to Homoeopathic principles, it is possible to treat these cases, often quite successfully, on the basis cf symptoms of the disorganised physiological system. I shall not enter into the theoretical background of this system of treatment, which is as profound as it is natural, logical and scientific, but I shall give here a few illustrative examples which will be more easily convincing to the suffering public.

A young man, a motor driver, suffering from intense pain in the epigastric region, had tried all kinds of painrelieving medicines and had also a long course of allopathic treatment, but to no effect. He lost his job on account of this illness. He was advised by the allopathic physician to have a proper diagnostic examination, which consisted in the chemical examination of the contents of the stomach, pathological examination of the feces and X-ray photograph of the upper abdominal viscera. For an ordinary jobless motor driver, it was a tall order and he could not possibly comply with the suggestions even if he was prepared to sell all his earthly belongings. The man was under homoeopathic treatment for about six weeks and completely recovered, though the exact seat or cause of the pain was still unknown. His last remarks were 'I feel as if I never had any pain.

A girl of fourteen, daughter of a professor, was suffering from acute pain in her left chest. The pain was so intense at times that she could hardly bear it. She had been given a course of cod liyer oil and other emulsions, but to no effect. She also had a course of injections of calcium. She also had X—ray photographs, but they did not indicate any lesion in the

alveoli or in the pleura. She was placed under homoeopathic treatment and in about six weeks, the pain completely disappeared, though the exact spot where it came from, could not be determined.

A patient badly sprained his knee in a friendly football match. He was laid up in a hospital for two months with his knee fixed with plaster-of-Paris. The plaster had been removed, and he was advised to renew his plaster for another two or three months. His brother, an allopath himself, agreed to the suggestion. But, the patient was very unwilling to lie in bed for a further period of two or three months on the ground that he was totally sick of continuously lying in bed, that he was afraid that such confinement might lead to a permanent deformation and above all, that he was under orders of transfer to a higher post, which he was likely to lose, if he could not join in time. He at last decided to place himself under homoeopathic treatment and he steadily improved, joined his duties and also joined the higher appointment in proper time. He has been quite all right since then. In this case it is not known what exactly happened with his muscles, ligaments or nerves. The homoeopathic physician was more concerned with the nature of the pain and the nature of the ailments of his whole body.

The wife of a rich colliery manager, was suffering from excruciating pain in abdomen which appeared to be located somewhere between the stomach and the jejunum. She had been under allopathic treatment for several years and when at last she was placed under homoeopathic treatment, the physician was presented with what appeared to be an album of X-ray photographs taken at different times at different angles. There was no diagnosis. There was no sign of any ulcer, or fibrosity or any lesion of any other kind. The last recommendation was an exploratory operation. She was under homoeopathic treatment for about four months and she completely recovered, though nobody yet knows the exact spot where the pain came from.

A lady, suffering from many vague complaints, had a miscarriage at the seventh months, which was apparently due to hydrometra, that is, excessive accumulation of liquor amuii in

the uterus. She had been under allopathic treatment all along and she had been told that hydrometra is a condition which is likely to recur at every pregnancy. The usual treatment is tapping, which is not very successful in many cases. At the next pregnancy, the lady and her husband were both unwilling to try allopathic treatment. She placed herself under homoeopathic treatment at the begining of the fifth month of pregnancy and continued until she was admitted to a maternity hospital for delivery at the end of the full term. She had a healthy son and both are well. The exact cause of the various ailments she suffered from is still unknown.

I shall not multiply examples. I should warn the readers against a possible misunderstanding. It is furthest from my mind to suggest that diagnosis is unnecessary. My point is that, even in cases where proper diagnosis becomes impossible or impracticable, it is possible to treat them according to the homoeopathic methods, based mainly on the study of symptoms, though a proper study and evaluation of symptoms are hundred times more difficult than reading of numerical figures in clinical examination reports.

—Health & Hygiene.
—Sunday Hindustan Standard.
—July 1, 1956. Delhi edition.

Note :—We come across several cases where all laboratory tests carried on for months fail to establish any diagnosis, and yet on presumption of various diseases from time to time various medicines are administered emperically, which instead of curing the patient, leaves him a toxicological museum. Alas ! if only they could assess the value of and interpret the meaning of symptoms in the Homoeopathic way, the purpose of cure could be achieved. —Editor.

THE MORE WONDERFUL ASPECT OF THE 8th WONDER OF THE CIVILIZED 20th CENTURY.

By

Mr. Krishna Charan B.A.

(*Govt. Document Expert, Jaipur.*)

As my previous compilation of certain quotations in respect of Homoeopathy was very much liked by many readers, I am tempted to present the other side of the picture to show—How large sums in astronomical figures are drained out every year in chasing a wild goose which has been always proving harmful and useless as is evident from the following. I will not say anything myself but would draw the attention of the readers to what the top-ranking authorities have been saying from time to time.

AWAY FROM X-RAYS :

"The allopathic practice of treating certain ailments like acne, warts and eczema with powerful X-rays is reaping a harvest of serious after-effects in these unfortunate patients. Far from curing the original ailment, the X-rays cause painfull ulceration and cancer in quite a few of the cases treated thus.

And the warning, ironically enough, has come from three allopathic doctors of Boston—Drs. Bradford Cannon, Judson G. Randolph and Joseph E. Muray.

Their report was based on 165 cases from their personal experience and the records of the Massachusetts General Hospital. They found that nearly half the patients suffered from painful ulceration, cancer developed in 22% of the cases. Out of ten patients treated for acne, nine developed skin cancer, This appears to be an increasing problem since twice the number were observed at the Massachusetts General Hospital in the decade 1948 to 1957 as to the preceding decade, said the doctors."

—Filmindia, April 1959.

"The result of the present day prevention is that a large number of inoculations and vaccinations are done on healthy and delicate systems of children and adults, creating a large number of drug diseases on the healthy human beings. It is a pity that innocent school children are annually subjected to these vaccinations and inoculations to prevent smallpox, dysentery, cholera, diptheria, etc. You are already aware of the great B. C. G. Campaign for which the Union Government are determined to spend crores and crores in spite of vehement opposition launched by our worthy veterans like C. Rajagopalachari. This inhuman campaign to introduce live T. B. germs into the healthy body has so far proved of no value whatsoever as is evident from a recent report of the T. B. Association of India.

—Dr. K. G. Saxena

The Homoeopathic Outlook April, 1959.

X-Rays :—Dr. Howard Curtis, speaking at the International Congress on Radiation Research on August 11, 1958, said that man's life is shortened by 12 days for every roentgen of radiation he receives. No matter how small the dose, radiation must

shorten life to some degree. Dr. Curtis said that when a pregnant woman undergoes fluoroscopic pelvic examination, she takes away two weeks from the ultimate life of the child by such an examination because it yields a dose of one or two roentgens to the embryonic baby." —The Indian Journal of Homoeopathy, April, 1959.

I quote below extracts relating to various diseases from text books of medicine writtan by Sir John Conybeare (Consulting Physician to Guy's Hospital, London) in association with Dr. W. N. Mann and Dr. G. E. Beaumont (Consulting Physician to Middlesex Hospital). The quotations for every disease are from the latest 1958 editions of both the text-books, used to create new doctors every year in India and other parts of the world.

Common Cold :—"There is no specific method of treatment and reliance must be placed on the use of analgesics to relieve pain and to overcome insomnia."

Whooping Cough :—"Although a variety of treatments are often advised to mitigate the paroxysms, it must be said at once that they are seldom effective. It may be stated categorically that pertussis vaccine is useless in the treatment of an attack."

Mumps :—"Rest in bed until subsidence of the glandular enlargement is all that is necessary". (They couldn't even think of a drug here)

Smallpox :—"There is no specific teatment for smallpox." **Rheumatic Fever :** "Cortisone has in general shown no better results in treatment than salicylates."

Chicken pox :—"Confinement to bed for a few days is all that is needed in the great majority of cases." (They couldn't find a drug again).

Dyspepsia :—"As regards drugs, amytal or phenobarbitone often helps to dull the keen edge of the patient's anxieties." (Nothing prescribed for the actual ailment).

Jaundice :—"Adequate rest in bed, plenty of fluid and dietary measures are the important points in therapy (You don't need an allopathic scientist for this) . Methionine and choline are important substances for their lipotropic action, but their use in these cases is of uncertain value. When severe nephrosis (acute yellow atrophy) occurs, little can be accomplished. Morphine should be given if necessary."

Malaria : "The Chemotherapy of malaria is still the object of intensive research, for the ideal anti-malarial drug has yet to be found ..Quinine is still the most valuable drug for emergencies .... when it is given as a suppressant the great drawback of quinine is that it may lead to chronic latent infection and blackwater fever may develop. It produces unpleasant side effects when given in therapeutic doses; nausea, vertigo, tinnitus, and deafness are common. Excessive dosage has led to amblyopia (dimness of vision) and permanent deafness." (and yet millions of Indians are being poisoned by Quinine every day by ignorant allopathic experts).

Dysentery :—"No satisfactory vaccine has yet been produced against bacillary dysentery (page 139). Many drugs have been used in the treatment of amoebic dysentery, and although they may be lethal to cultures of the delicate amoeba in the laboratory, there is yet no preparation which can be relied upon by itself to eradicate the infection from the bowel."

Cholera :—"As yet there is no specific therapy for cholera. Neither sera nor the sulphonamide drugs have proved to be of use."

Rheumatism :—"Gold may produce toxic reactions in the skin and mouth, the liver, the kidneys and the haemoptic system. Sensitisation of the skin may produce a mild eczema or a severe exfoliative dermatitis . ...The symptomatic improvement which sometimes occur in rheumatoid arthritis when cortisone or corticotrophin is given at first held out hopes for the successful treatment of the disease. These hopes have not been fulfilled."

Influenza :—Probably no diagnosis is made so frequently and often with so little justification as that of influenza .. In 1918 the number of deaths from this disease must have far exceeded the total of those killed in the war." "Vaccinaiion with an anti-influenzal virus vaccine is of doubtful value ... There is no specific remedy."

Typhoid : - "The problem of the chronic typhoid carrier has not been relieved by the discovery of new antibiotics, Chloramphenicol is not effective in sterlizing the established carrier." There is no treatment which will inevitably cure a chronic carrier,

While on this subject let us confidently state that everyone of the diseases mentioned above is both preventable and curable in Homoeopathy and many more diseases, normally beyond the scope of allopathy, can be successfully treated by Homoeopathy.

Penicillin :—The queen of drugs, has now started killing people according to a report of the World Health Organization. In 1957, over 1000 deaths from anaphylaxis (Hyper-sensivity) due to Penicillin had occurred in United States alone. In India we don't count the dead. Dr. Sheppard Siegal of New York the other day told a gathering of American allergy experts that "Penicillin might cause severe illness and even death if indiscriminately used." Dr. Abrahem Rosenthal of Brooklyn reported that, "8 persons in Brooklyn died within minutes after Penicillin injections from massive allergic reactions." Thousands of Indian allopaths are still using Penicillin like X-mas bonbons these days not knowing that it has started killing the people now. —Filmindia

"Salk vaccine : -This famous vaccine, which was announced as a lifesaver in cases of poliomyelitis, itself gave the dread disease to 77 children within a month of its general use. The Cutter Laboratories of Berkeley, California, are now facing damage suits worth $ 810,000,00.

"Drug Dangers:— Throughout history, patients have been made sick, and some have been killed, by the medicines they took. But these were incidental or (as doctors call them) "side" effects. Relatively uncommon, such cases had to be weighed against the usefulness of the drugs for the majority. Now, with chemical laboratories brewing up, ever more potent drugs, more and more diseases are directly caused by drugs. Unlike most old-fashioned side effects, they do not necessarily disappear obligingly when medication is stopped. In Postgraduate Medicine, the University of Kansas' Dr. Jesse D. Rising, lists an alarming catalogue:

" As many as 10% of patients with high blood pressure, after intensive treatment for several months with Hydralzine (trade name: Apresoline), developed symptoms resembling those of rheumatoid arthritis or disseminated lupus erythematosus; stubborn cases may need treatment with *ACTH* or cortisone-type hormones which can also be dangerous (see below).

"Other victims of high blood pressure, under treatment with hexamethonium, may have "a dramatic type of respiratory disturbance, with breathing difficulties, fever, cough and chest pain, and turn blue. This, though rare, can be fatal within a month.

"A third drug for dropping the blood pressure, mecamylamine (trade name: *Inversine*), sometimes causes serve anxiety or depression and is suspected of having triggered disabling mental illnesses. Other patients have developed chorea (muscular twitching), with tremor, slurred speech, and difficulty in controlling the joints; in some cases the symptoms have resembled multiple sclerosis; in others there have been severe epileptoid seizures.

"A fourth hypotensive, *reserpine*, may speed the appearance of peptic ulcers or worsen those already developed. It also commonly causes depression, often severe, and sometimes marked by delusions or persecution and suicidal impulses. And reserpine can hasten the death of patients with damaged hearts.

"The ataraxics:—(tranquilizers) built around the phenothiazine molecule (trade names : Thorazine, Compazine, Sparine, Pacatal) are so potent "that it is surprising they do not cause more undesired side effects. One of the commonest is Parkinsonism, with rigidity, tremor, pillrolling motion of the hands, disturbances of all movements and drooling. Symptoms may persist two or three months after medication is stopped. Thorazine can also cause severe liver damage sometimes fatal.

"Cortisone-type hormones:—stimulate peptic ulcers-despite combinations with antacids-sometimes to the point of perforation. Some patients experience extreme mood changes like the maniac and depressive phases or manic-depressive psychosis. Especially in children, the hormones can touch off grand mal epilepsy; in oldsters, they may weaken the bones to the point of spontaneous fracture.

"The diuretic acetazolamide (trade name: Diamox), often given to heart patients to help flush the brine out of their systems, can so upset a congested liver as to cause hepatic coma-espically when it is given in combination with ammonium chloride.

"Antibiotics, espically the broad-spectrum family (best-known trade names: Achromycin, Aureomycin, Terramycin) kill so many of the harmless bacteria normally found in the digestive tract that they let the more harmful bacteria run riot. A resulting inflammation of the intestines, which may be "a deadly disease"- is usually the doctor's fault.

"Cycloserine, an antibiotic used against tuberculosis, has such a narrow safety margin that a slight overdose can cause grand mal seizures. It is also blamed for severe emotional reactions and is dangerous for patients with kidney damage.

"Isoniazid, wonder drug of 1952 against TB, may set off inflammation of the peripheral nerves, causing phantom sensations, numbness, burning pain and weakness. Unless caught early and treated with vitamin B6, this neuritis becomes permanent.

"Worst of all Dr. Rising warns, a doctor treating a woman during pregnancy with *anaesthetics, X rays, ACTH* or *cortisone-type hormones,* may subject the foetus to oxygen

shortage or some other threat. The result: "Physicians now face the horrible posibility that they, in addition to certain 'acts of God,' are responsible for many developmental defects." He lists babies born with one eye, abnormal hearts, cleft-palate or mongolism, and Siamese twins.

The Time, Weekly,
October 27, 1958.

"When synthetic hormones were developed, it seemed reasonable to prescribe them when a person's metabolism got disturbed. But it turned out that in correcting one matabolic disturbance, a synthetic hormone sometimes badly scrambled other parts of the patient's chemical machinery. By its wild-horse chemical kicking it might hold too much salt in his cells, waterlogging him and putting a dangerous burden on his heart. It might contribute to the development of ulcers, apparently by making stomach secretion overactive. Too much hormone might cause sugar in the urine, send blood pressure too high, soften the bones. It might speed up mental action, making the patient feel as if he were on top of the world; then and by driving him into behaving insanely.

--Taming the wild Hormones
—Reader's Digest, October 1958.

"**The Bhore Committee** recommended a doctor for every 2000 of the population of India. If we take into account the various classes practising different systems of medicine namely, Ayurvedic, Unani, Homoeopathy, etc, the ratio will appear to be more in favour of the patients. It will be a nearer approach to the ratio of one per thousand of the population. These systems of medicine have their deep-seated roots in the soil of India, economical from the side of the patient and have established a reputation not always without reason in open competition with the more modern system of scientific medicine. Above all, these other systems of medical practice, can not at this stage be brushed aside by a stroke of pen when they are better suited to the temperament of the people and can certainly claim a larger number as followers".

--Dr. D. C. Chakrobarty, F.R.C.S.,
—Principal, Calcutta Medical College
--Homoeopathic Bulletin, January 1959.

The famous professor, Dr. Von Eiselsberber, professor of surgery at the Vienna University, in his lecture before the Vienna Surgical Society on Reform of First Aid Dressing said that it is a disadvantage to use idoform, carbolic acid etc., and that on the first aid dressing the patient's fate often depends. He indicated especially carbolic acid, which had done much harm in the primary treatment of wounds. Also the great *Professor Billroth* had warned against its use. Even weak solutions of carbolic acid may lead to gangrene, and iodoform preparations should be abandoned. In most cases it is best to use dry clean coverings to absorb wound secretions without previous washing and disinfection because not all infecting material is thus removed, and disinfectants disturb the prophylactic wound defense. *Professor Eiselrberber* even opposes the washing of fresh wounds because the wound margins thereby swell and loss the power of resistance. Also the great Berlin professor of Surgery at the University, Dr, Von Bergmann, warned against touching and washing wounds, and that when the bleeding had been stilled plain sterile, not disinfecting wound-covering should be used,

Dr. B , the professor of surgery at the University, considered the further enlargement on the trsacheotomy opening as daring, perhaps useless,

Excerpts from Internal Healing Art in Surgical Diseases
—Hahnemannian Gleanings, Feb., 1959,

The Health Minister of Orissa confirmed in the Legislative Assembly that inspite of anti-cholera innoculations, all the 500 inhabitants of the village Hathipijari (Dist. Kalahandi) except one infant child, died of cholera.

—"Hahnemann" Bengali monthly Baisakh 1366.

The 'British Medical Journal' said: "Can there be any doubt that in many respects the knife as a cure for Cancer has been a ghastly failure ?

Sir James Paget acknowledged that Surgery cannot even be given the credit of prolonging life, to say nothing about saving life. He said: "I am not aware of a single case of recovery".

Dr. Mc. Farlan, professor of surgery in the University of Glasgow, wrote "the operation never arrests but uniformaly accelerates the progress of disease".

Dr. Francis Carter Wood, Vice-President of the Association for the Control of Cancer, said, "Radium will not cure Cancer, it only destroys Cancerous tissue within a certain radius, but does not drive the disease from the blood (a significant double admission). The ghastly dangers and total failures of radium and X-ray to cure Cancer are so well-known now that it is only necessary to mention and condemn it.

—Cancer & Homoeopathy

—The Homoeopathic Magazine March, 1959, Lahore.

"Modern Advance in Diagnosis has not shown cure. The X-rays, Red-Rays, Ultra-violet Rays, Violet Rays, Radium Exposures, Sinusiodal and Galvanic Current applications, Thermal appliances and all the modern paraphernalia for diagnosis has not made a headway in allopathic science for diagnosis or cures. On the contrary evil effects of exposures to such rays cannot be ignored. *Dr. Eli Jones,* a well known authority on cancer has depicted evil effets of such treatment for cancer and declared treatment by such rays as "inhuman and cruel".

"SURGERY has made great strides as an art in recent days, but the principle of trying to cure disease by removing its effects is challenged. Dr. Eli Jones has condemned operation of cancer by saying "to cut out a cancer is worst form of malpractices, for it is only trying to remove the effects without touching the cause." "May God," he says "hasten the day when it will be considered A CRIME TO CUT OUT A CANCER.. I can honestly say that I have never seen a genuine case of cancer cured by a surgical operation." He is of the opinion that cancer patients exposed to operation are "BUTCHERED IN THE NAME OF SCIENCE."

Dr. W. MacEwen, an English surgeon who claims to have performed more operations for appendicites than any other surgeon in England, after many years of practising, warns against this fashion and he tells that he has made special studies which force him to conclude that the appendix is interested in the process of digestion.

Dr. A. Vogt, himself an Allopath, after collecting the particulars of 400,000 cases of smallpox says, "I am compelled to admit that my belief in vaccination is absolutely destroyed."

How dangerous are the effects of Allopathic drugs, can be gathered from the confessions of Dr. William Lee Howard who says:- "Drugs and narcotics will put your extensive (bodily) wireless stations completely out of order, so that they can never be repaired".

—"A Boon to Humanity"

And yet inspite of all these facts, Allopathy is called 'modern' and a 'science', and the dangerous game of drugging

the humanity with poisionous drugs is pursued with unabated zeal. That is the most wonderful part of the wonder.

Dearth of space prevents me from listing more startling quotations from more eminent Physicians & surgeons and from well-known Journals and authoritative books and hence I request the readers to kindly collect and read the following which are rich with very many authoritative startling and revealing quotations and various other informations.

1. Mass murders by Allopathy. Editorial in the Filmindia, January, 1959.
2. But for our follies and dogmatic short sightedness the boons of scientific knowledge turn into curses-"Homoeopathy" monthly-Feb. 1959, Lucknow.
3. A boon to Humanity, a booklet published by Dr. B. R. Chuga, Nilam Mansion, Lamington Road, Bombay-4.
4. Small pox & Vaccination by Dr. Diwan Jai Chand, D.P.H. (Edin); D.T.M. (L'Pool); L.M. (Dub.) L.R.F.P. & S. (Glas.) L.R.C.P., L.R.C.S. (Edin.) Etc., ex-Deputy Sanitary Commissioner, Punjab, Member, Homoeopathy Enquiry Committee etc. etc. & Dr. Chandra Prakash, New Colony, Jaipur.
5. अब कैसे होगा जीना ? "कल्याण" मासिक, नवम्बर १९५८, गोरखपुर ।
6. यह वैज्ञानिक इन्द्रजाल—"कल्याण" मासिक, मार्च तथा अप्रैल, १९५९ ।
7. वैज्ञानिक अन्धविश्वास—"कल्याण" मासिक, मई १९५९ ।

And after reading all these I request you all to consider, if even the so called quacks, unqualified and untrained Homoeopaths are able to cure plenty of baffling and undiagnised acute diseases and diagnised but incurable chronic cases, what wonders can be achieved if the Govt. takes up the responsibility of training up really qualified and trained Homoeopaths in Hahnemannian principles of pure Homoeopathy ?

Similarly the practice of Tonsilectomy, use of Tr. iodine on wound, Mercurochrom and Arg. Nit solutions in the eyes of babies, Cauterisation etc. are now condemned by the very school who once advocated the same.

If possible, I hope to give in the next issue some press clippings on B.C.G., vaccination, innoculation etc. for the knowledge of the readers.

WHAT IS NATURE CURE

By

J. M. Jussawalla, N D., D.O D.C. (Eng)

The Fundamental Law of Cure

"Give me fever and I can cure every disease". Hippocrates, the father of Medicine, formulated the fundamental law of cure over two thousand years ago. This same law has been expressed by Dr. Henry Lindlahr, the pillar of Nature Cure movement in the following statement: –"Every acute disease is the result of a cleansing and healing effort of Nature."

Making a general application of the law, we deduce that all acute diseases from a simple cold to measles, scarlet fever, diptheria, small-pox, pneumonia, etc; represent Nature's efforts to remove from the system some form of morbid matter, virus or poison dangerous to health and life. In other words, acute diseases cannot develop in perfectly normal healthy body living under conditions favourable to human life. Every outbreak of the skin, whether as rashes, boils, carbuncles, etc., mean that the life force in the body is seeking to expel matter which is superflous, objectionable or poisonous. Diarrhoea is another typical self cleansing effort on the part of Nature to liquify, and thus more easily get rid of foul, fermenting or unwholesome matter from the bowels. Still less visible are the efforts of Nature to expel poisons or wastes in minute chemical or crystalline form through the kidneys in the urine, and in perspiration and gases through the pores of the skin and from the lungs.

The profoundly sane teaching that all these acute and feverish ailments and diseases are in reality self-purifying efforts on the part of Nature should be more generally acceptable if peoples minds were not so hypnotised by the disease germ idea which has been disastrously exaggerated and misunderstood by prevailing medical thought.

Nature cure does not neglect the increased knowledge of the human body in modern times. Neither does it deny existance of microbes-misnamed 'disease germs'. But it teaches that these disease germs do not begin the trouble; they appear and flourish only where there is already a 'soil' in which the disease germs can flourish.

The question may be asked "If acute diseases represent Nature's healing efforts, why is it that people die as a result of them ? The answer to this is: The vitality may be too low, the injury or morbid encumbrances too great, or the treatment may be inadequate or harmful, so that Nature loses the fight. Still acute diseases represent the effort of Nature to remove the causes of disease and thus to re-establish normal health condition.

Nature's healing efforts can also be confused, baffled, or suppressed by the many drugs, ointments, vaccines, etc, which the medical profession has now at its command and also by needless surgical interference. All these lead to no definite cure but instead merely remove, alter or suppress the symptoms and feelings. Nature can be baffled but always sooner or later exacts grave penalties. The increase of chronic diseases, morbid growths, etc. in modern times is the price paid for suppressing, changing or seeking to prevent by unnatural means Nature's curative efforts.

—Health and Longevity

HELP US !

TO BUILD THE REGISTER.

The Rajathan Homœopathy Association (Regd.) New Colony, Jaipur, has, for one of its objects, to compile a complete Register of all the Practitioners of Homœopathy; and we are keen to do it early.

Could you help by introducing to us the names and addresses of Homœopathy Doctors in Rajasthan ?

It will serve the cause of Homœopathy, and any contribution by you would be obliging.

Thanks.

Secretary,

Rajasthan Homoeopathy Association,

A case of confirmed insanity permanently cured with Homoeopathic Medicines within 3 months.

By

Dr. Chandra Prakash, New Colony, Jaipur.

A graduate girl aged 19 years belonging to a family of several renowned Physicians and Surgeons, (M.,R.C.P., and F.R.C.S.,) developed insanity. Their relations had reluctantly decided to send her to mental hospital.

In the meanwhile, one of our patients connected with the same family introduced the case to us and arranged to put her under our treatment on the 16th October, 1956.

The written history as submitted to us is given below :—

Had too many boils on the legs, thighs and hips from age 2 years to 8 years. Had fearful enlargement of liver with swelling on abdomen, fever, dysentry etc. when 9 years old. Also had severe pain in legs for 6 months. Again dysentry at age 12 years, which continued for several years inspite of Allopathic treatment, and even now indigestion and stomachache continue with several irregular motions daily.

Had been timid, yeilding, affectionate since childhood, rather too good. Quite good at studies. But always used to be easily frightened, could never sleep alone (Nightmare). When joined the college for Intermediate she was too much afraid of boys, and was reluctant to go to College on that account. Has been quite affectionate and cheerful and satisfied with whatever food or clothes she could get.

The recent development of insanity seem to have started after an episode in 1955 when some people came to see her for matrimonial proposition. She got scared and became very nervous. She also felt insulted when they disapproved.

Thereafter she could not set her attention to studies, became restless and sleepless, also wore a solitary, stunned and reserved attitude, not talking much. Became hypochondriac, despondent, nervous and easily frightened. Used to express her desire to commit suicide with pistol shot, if pistol could be available. Always afriad of the night and darkness, with absolute sleeplessness. Has been a good student of music also.

To add fuel to the fire of fear, it so happened that in August 1956, a horrible murder took place in a yard adjoining to

their house causing a great row in the midnight. Since that incident she became all the more fearful and sleepless developing loquacity with irregular, irrelevant and inconsistent talks, laughter and so on.

Also started spilling face powder and other cosmetics on hairs and face, perhaps with a vain desire to look beautiful, laughing too much, talking too much, cannot sit at a place for more than two minutes, fidgety, suspicious of all persons, jealous, revengeful, easily annoyed, always concious and talking of her accomplishments. Hates men, changing moods, anxious, hot tempered, gets easily tired and frieghtened even on slightest noise, cannot be consoled. In music and studies challenging everybody to compete with her. She seemed to have suffered indignation and insult, nursing a desire to avenge, trying to prove that Art is everything beauty nothing.

Has recently developed ravenous hunger, eating several times, takes bath for long hours rubbing much of soap and oil. Often wetting the head only with cold water. Cannot sleep at all and perhaps resists sleep by walking, singing, laughing, talking. Perhaps on going to sleep she gets horrible dreams about the ugly and dreadful sight of the murdered person. Menses remained supressed since last Sept, but again started in January. Since regular but not clear.

All this presented a complicated picture with so many important symptoms that even repertorising would prove very much confusing.

We, therefore, compared the following apparently indicated medicines for the symptoms given, and eliminated some for the reasons also given.

1. Aconite, Opium, and Coffea, for permanent ill effects of fear, anxiety, sleeplessness, restlessness etc.

2. Puls and Aloes for hateful of men and boys, too much drugging etc.

3. Puls for early history of timid, gentle, affectionate and yeilding temper, likes open air and cold bath.

4. Sulph, Tuberculinum, Psorinum, for history of boils in legs for several years in childhood, also fears, dysentry etc. but eliminated the same became she is now fond of bath, water, cold air etc. lack of dirtyness or bad smell etc. neither susceptible to catch cold.

5. Conium, for desire to dress well, possible sex hunger etc.

6. Staphisagria, Ignatia, Nat. Mur, Lachesis for changeable mood, laughter, irrelevant talks, anger, indignation, suppressed mense, ravenous hunger, sleeplessness, restlessness, fearfulness, suspicion, revengefulness, disappointment, sexual or otherwise, cannot be consoled, fear to go to sleep.

7. Hyoscyamus and Lachesis for loquacity, fear, hate, revengefulness, suspicion, liking for cold bath and water etc.

But in order to weigh the value of the symptoms in the given case, on close study, we came to the conclusion that fear, hate, sleeplessness, restlessness, anxiety superceeds all other symptoms in importance and persistance all through her life since birth. We, therefore, decided to remove the ill effects of fear first of all.

On close Comparision and study of Aconite, Coffea and Opium; Coffea seemed to cover about all the symptoms and appeared to be the nearest simillimum. And Lo ! with the very first dose of Coffea given in the evening of 16-10-56 she got good sleep for the whole night, for the first time after a long period of sleeplessness. The day to day reports and medicines given are reproduced as it is from the case book.

16-10-56.		Coffea 200-2.
17-10-56.	Had quite good sleep with only one dose of Coffea 200; too much laughing.	Coffea 200-1.
18-10-56.	Had quite good sound sleep whole night.	Nil.
19-10-56.	Has been having good sleep since taking coffea 200 on 16-10-56; also less laughing or quarreling, less violent.	Phytum -2.
22-10-56.	Seems to be keeping quite normal, all complaints much less	Phytum -2.
23-10-56.	Had no sleep last night upto 12.00 mid-night; could hardly sleep upto 2.30 a.m.; was more furious and also more desire for bathing, also laughing much (a dose of Coffea 200 was also given if Puls 200 fails to work. Puls was prefered for her former timid nature)	Puls. 200-1. Coffea 200-1.
24-10-56.	Slept quite well with 1 dose Puls 200 also remained quiet and normal, behaved well. (Coffea 200 not taken).	Nil.

25-10-56. Was out of humour last night untill two doses of coffea 200 were given, then slept at 11 p.m. till 6 a.m. was rather restless and maniac from morning till 12 a.m. then O. K. Aconite 30-2.

27-10-56. Getting quite sound sleep, no more violence; behaves well. Nil.

31-10-56. Had slight stomachache with repeated motions, 4 or 5 loose stools. Aconite 200-1.

1-11-56. Complains of headache and became again irritant, restless, behaving insanely. Coffea 200-1.

2-11-56. Headache constant over the head, stomachache with motions after every meals. Aloes S. 200-1.

3-11-56. Could not sleep last night upto 1.00 a.m. on account of playing cards; had sleep for two hours only. Coffea 200-1.

6-11-56. Getting regular good sound sleep, behaves well, but for changing moods, shifting pains and headache. Ignatia 200-1.

9-11-56. Sleep sound, doing well. Nil.

10-11-56. Headache and pains in body shift from place to place; likes open air which relieves headaches and pain. Hates boys and men. Fears night, dislikes moon and stars. Nil.

12-11-56. Sleep O.K. but no other change. Does not report about headache or stomachaches, early morning nausea and giddiness on getting up; also pain in legs. Ignatia 1M.-1.

16-11-56. Last night the sleep was slightly disturbed; pain in stomach; quite thirsty. Repeated motions. Nat. Mur. 30-1.

20-11-56. All well, sleeps well, behaves well, no more frequent motions, nor desires so frequent bath, but is still too much talkative, snoring, easily frightened. Opium 200-1.

26-11-56. Gets up with thirst at night also wants the doors open early morning, slight nervousness with headache. No more fear, can sleep alone now. Less talkative. Puls 1 M-1.

29-11-56. Sore throat, repeated motions though with good stools. Argt. Nit. 30-4.

3-12-56. Has observed that the sleep is disturbed on the 29th night and is believed that it happens so every 15 days. May be that it was due to seeing Cinema on the same day. Nat. Mur. 1 M-1

7-12-56. Complains of stomachache Nil.

14-12-56. Had 8 or 9 motions day before yesterday during day only, headache, stomachache, mentally gradual imporvement continues with better behaviour, childish behaviour, no more stools now, no more stomachache. Placebo-4.

18-12-56. Occassional stomachache with a few stools yesterday evening, but all well to-day. Placebo-2.

19-12-58. All well. Placebo-2.

27-12-56. Complains of stomachache. Four or five motions almost every day. Talks a lot, laughs on trifle matters. Gets annoyed at slightest provocation. Very obstinate. Feels interested in teen aged boys. Nat Mur. 10 M-1.

2-1-57. No headache, no stomachache, no irregular stools, appetite good, rest O. K. Placebo-4.

7-1-57. No longer foolish laughs, much better in all respect. Nil.

10-1-57. Still afraid of sleeping alone. Placebo-4.

14-1-57. Too much singing, no more laughing or talking headache on the left eye-brow also in right eye. Nil.

18-1-57. Reports pain in right forehead and eyes also in left sometimes, also here and there. Placebo-4.

22-1-57. Repeated motions during the forenoon, occassional headache, pain here and there. afraid of darkness. Tubercullinum 200-2.

26-1-57. O. K. Going to Dehradun. (Aconite 30-8 doses in reserve, if necessary).

7-3-57. Reports from Dehradun all well but for a little talkativeness. Nat. Mur. 10 M-1 (Sent to Dehradun).

17-8-57. Reports perfectly alright. No medicine.

Her mother recently (February 1959) called on us to express her gratitude with a basket of sweets, reporting that her daughter is quite O.K., and that she is now a teacher in a school and the sweets are on account of her matrimonial engagement.

This proves that the case needed only coffea to remove the ill-effects of fear, sleeplessness and excitability, and Nat. Mur. was the Homoeopathic Simillimum. One may accuse us of giving Aconite, Pulsatilla, Ignatia, Aloes, and Tuberculinum, because indeed Nat Mur. alone is a great deep acting and long acting medicine of very wide range covering about 1349 symptoms (Chronic diseases) or even more as has been subsequently clinically observed. But the practical difficulty is that one can never know the exact simillimum with certainty until and unless the medicine proves its clinical worth in the particular case. To avoid hasty repetition we sometime take resort to the nearest indicated complimentary medicines intercurrently, which also certainly give a helping hand and remove some obstruction. Whereas it may sometime interfere with the action of the main simillimum, we have also seen it hastening the cure by creating a better field for the main medicine to act curatively without much reactionery aggravations.

We feel that while writing a case history some omit the portions of lesser medicines given; but we purposely reproduce the whole course of the case from the case book with all our errors if any.

"It is very difficult in our poor country to extend medical aid to these so many people through the Allopathic system of treatment which is very costly and makes us bankrupt by spending in various tests and antibiotic medicines and even then the patient does not folly recover. He cited his own case of Pneumonia in which he had to undergo many tests and devoured many antiboitics but could not fully recover for nine months inspite of antidotes etc and was completely cured by Homoeopathy. In my opinion Homoeopathy is the only system of Medicine which can eradicate disease from our country on account of its effectiveness and low cost. There are mental symptoms in Homoeopathy which influence a great deal in curing a patient."

— Shri Satya Narain Sinha,
—Homoeopathic Sanderh,
—November, 1959.

RAJASTHAN HOMOEOPATHY ASSOCIATION (Regd.)

New Colony, Jaipur (Rajasthan).

ANNUAL REPORT.

Prsesented by the Secretary, Dr. T. S. Chohan, in the first Annual General meeting held on 10th April, 1959.

Mr. President, Ladies & Gentlemen,

I have pleasure to present the Annual Report of this Infant Association which was incorporated on the 16th May, 1958 which means that we have not yet had even one full working year.

Yet I believe the response and the co-operation received from the members is quite encouraging. Besides, the hard work of our President has been able to achieve unexpected appreciation for the Association from the outside world such as from England, America, Ceylon, Pakistan, Calcutta, Bombay Gwalior, Singapore, Lucknow etc. within this short period.

We have been able to enrol 10 life members, 6 patrons, 104 members and have collected Rs. 1,207/- by way of donations.

If things go on as at present we hope to achieve a unique position for this Association and the deserving status for the unique science of the Homoeopathic system of medicine, which will naturally go a long way in serving the nation at large by saving much of national wealth and protecting the national health against continued mental and physical suffering from various diseased conditions.

I must pay enough tributes to our editors who have been able to print two issues of the quarterly magazine of valuable merits in such a short time and under difficult conditions. The standard of our Journal is much above the average Homoeopathic Journals published by other organisations. The high standard of the magazine has promptly elevated the dignity of our Association and drawing many a new members and supporters from all over the world.

The excellent merits and the efficacy of the Homoeopathic treatment is such that it is becoming more and more popular everyday inspite of all opposition from the old school and stepmotherly attitude of the Government.

All interested in Homoeopathy are now becoming more and more enthusiastic and organising Associations all over the country. The hallowed memory of the great Samuel Hahnemann who gave us the knowledge of useful applications of the unlimited powers of medicines, resounds all over the world every day with special celebration of his birthday everywhere on 10th April every year.

While we pledge our support to all associations everywhere and pay tributes to all individuals whosoever does anything for the cause of propagating the value of Homoeopathy, we wish all could unite in a strong organised way.

Homoeopathic practitioners from Ajmer, Jodhpur, Beawar, Bikaner, Dungargarh, Asalpur etc. are also gradually joining hands with us and have pledged their co-operation in all matters. Many of the local Homoeopathic practitioners have also joined our Association while some others have signed the application forms. We hope they will soon pay in their subscriptions.

We have opened nine free epidemic preventive centres at Jaipur, Ajmer, Beawar and we hope to open plenty more at all other towns and villages of Rajasthan. For this we invite the co-operation of the practitioners all over Rajasthan.

Before closing I now thank all of you who have been so kind to spare your valuable time for attending this meeting and I beg to request all members to enrol more members to the Association and subscribers to the TORCH and also to collect donations so that we may soon see the bright day of having a full fledged Homoeopathic College and Hospital in Jaipur or anywhere in Rajasthan.

I have also to thank Dr. Chandra Prakash who has been kind enough to allow the privilege of using his personal library to all our members and all interested in the study of Homoeopathy.

Thank you!

Jai Homoeopathy! Jai Hahnemann! Jai Hind!

The minutes of the proceedings of the 1st Annual General meeting of the Rajasthan Homoeopathy Association held on Friday the 10th April, 1959 at 2 P.M. at the Registered Office of the Association at C 17 New Colony, Jaipur.

President Dr. Chandra Prakash took the chair.

The Secretary Dr. T. S. Chohan, presented the annual report (cheers) and the Treasurer Mr. Krishna Charan, presented the Accounts upto the period ending 31st December 1958 as audited by M/s. B.D. Gargeiya & Co., Chartered Accountants and as already published in the April, 1959 issue of the Association's Journal the TORCH of Homoeopathy. The members present very much appreciated the multifarious activities and the progressive achievements of the Association in such a short period of 7 months only as this Association was registered in the month of May 1958. The members also felt highly satisfied with economical working of the Association.

The following office bearers were unanimously elected for the next term—

President	Dr. Chandra Prakash.
Vice-President	Shri M.D. Bhargava, Advocate, Supreme Court.
Secretary.	Dr. T.S. Chohan.
Joint Secretary	Shri S. L. Jain.
Treasurer	Shri Krishna Charan, B.A.

Members:—

Dr. A. Braz, M.B.H.
Dr. P. N. Srivastava.
Shri A. M. Shah, M.A.,M. Com., LL.B.
Dr. A C. Mukherjee.

The treasurer Mr. Krishna Charan thanked Dr. Chandra Prakash on behalf of the Association for allowing the use of his office, furniture, typewriters and various other facilities.

The 204th Brithday of Dr. Samuel Hahnemann, the founder of the Homoeopathic system of medicine was celebrated with a talk by the President who gave a short life sketch of Dr. Samuel Hahnemann and a short history of how he discovered the Homoeopathic law of therapeutics and made known to the

world the behaviour and the manner of Nature's operations in relation to human health, body & mind, diseases and their cures with medicines.

The President garland the Photograph of Dr. Hahnemann in the office of the Association.

Several other speakers paid glowing tributes to the memory of Hahnemann and the blessing of Homoeopathic system of treatment. President Dr. Chandra Prakash thanked the office bearers and members for their co-operation and appealed to all members to take more initiative in the working of this infant Association so that the Association may prove more useful to the people and achieve its aim. He also thanked all member present for their kind co-operation.

The meeting dissolved after a vote of thanks to the chair.

FREE HOMOEOPATHIC EPIDEMIC PREVENTIVE CENTRES IN RAJASTHAN.

The Rajasthan Homoeopathy Association (Regd.), New Colony, Jaipur has opened Epidemic Preventive Centres for the benefit of the public.

Person not willing to take injections, vaccination and other innoculations for Small pox, Measles, Cholera, Typhoid. Influenza, etc., may take free Homoeopathic preventive treatment at the folllowing centres :—

Prakash Homoeopathic Charitable Dispensary, New Colony, Jaipur. 5 to 7 P.M.

Dr. A. C. Mukherjee's Homoeopathic Dispensary, Jaipur, 6 to 8 P M.

Dr. Kala Chand L. Ramchandani, Mishra-rajaji-ka Rasta, 6 P.M. to 8 P.M.

Dr. Tara Singh Chohan, Anand Bhawan, Khazenewalon-ka-Rasta, Jaipur. 7 A.M. to 8 A.M.

Dr. A. K. Nag, Kaiserganj, Ajmer, 8 A.M. to 12 A.M. & 5 P.M. to 8 P.M.

Dr. Anthony Braz, M.I. Road Jaipur, 9 A.M. to 12 A.M. and 5 to 8 P.M.

Dr. Amolak Chand Surana, Beawar.

Dr. Badri Prasad, Beawar.

Dr. Prakash Narain Srivastava, Chandi ki Taksal Jaipur 5 P.M. to 7 P.M.

Dr. S Kaushik, B.M.B.S. (H), Asha Homoeo Medical Hall, Gandhinagar, Jaipur, Morning 6-30 to 8-30 A.M. Evening 5-00 to 7-00 P.M.

List of new members enrolled since last issue.

Donors :—

4. Dr. Dominic D'souza, Homoeopath, Purusshotam-wadi (New Chawl) Lok, Tilak Road East, Mulund (Bombay) — Rs. 1/- only.
5. Dr. Mange Lal Khandal, H.M.D., Village & P.O. Papurana (District Jhunjhunu) (Rajasthan) — Rs. 1/- only.

Life members :—

16. Shri Umed Mal Shah, Shah Building, Chaura Rasta, Jaipur City.

Members :—

97. Shri Prabhu Das Manek, 54/A, Zakeria Street, Calcutta.
98. Shri R.K. Bhatnagar, Assistant Station Master, Asalpur. (Via-Phulera).
99. Shri Chandra Prakash Saxena, Steno, The Ram Bagh Palace, Jaipur.
100. Dr. Ramzan Ali Chopdar, C/o Wine & Beer Store, K.E.M. Road, Bikaner.
101. Dr. Jugal Kishore Bhatia, Bhatia Homoeo Medical Hall & Institute, Railway Road, Bikaner.
102. Shri Hari Shanker Chudiwala, C/o Ramji Das Damodar Das Chudiwala, P.O. Lachhmangarh (Sikar).
103. Shri Abhay Kumar Bairathi, Nataniyon Ka Rasta, Tripolia Bazar, Jaipur City.
104. Dr. W. T. Talreja, Homoeopath, Khazanewalon Street, Chandpole Bazar, Jaipur City.
105. Shri Lal Bahadur Saxena, Ex-M. L. A. Mohalla Khajurpura, P.O. Baran (Kota).
106. Dr. Ramdeo Khatry, C/o Mahadeo Lal Saraogi Homoeopathic Aushadhalaya, Rajgarh, P. O. Sadulpur (District Churu).
107. Dr. Prakash Narain Srivastava, Homoeopath, Rasta Shankerji Gujar, Chandi Ki Taksal, Jaipur.
108. Dr. Amolak Chand Surana, Homoeopath, Loharan Chopar, Beawar (Rajasthan).
109. Dr. Dominic D'souza, Homoeopath, Purushotamwadi (New Chawl), Lok Tilak Road East, Mulund (Bombay).
110. Shri Milap Chand Dandia, C-5, Bapunagar, Jaipur.
111. Shri Madan Lal Jaipuria, P. O. Kunari, Kota (Rajasthan).

112. Dr. Mange Lal Khandal, H.M D. Village and P. O. Papurana (District Jhunjhunu) (Rajasthan).
113. Shri U. S. Dheer, Representative, India Tyre and Rubber Company Private Limited, 138, New Colony, Jaipur.
114. Shri Jagjeet Singh, C/o. S. Nihal Singh, Atwal Nagar, ASANSOL.
115. Shri Kastoor Chand Khetan, Khetan Building, M.I. Road, Jaipur.
116. Shri D. K. Datta, 35-C, Laka Palace, Second Floor, Calcutta-29.

हिन्दी विभाग-

दी टार्च आफ होमियोपैथी

जुलाई १९५९

सम्पादकीय

हम एलोपेथिक चिकित्सा प्रणाली के बहुमुखी विकास के विषय में प्रतिदिन सुनते हैं परन्तु वास्तविकता कुछ और ही है। इस प्रणाली का प्रचुरमात्रा में प्रचार ही सब कुछ है। अन्यथा, यदि तथ्यों का कोई अवलोकन करें तो स्तब्ध रह जायगा और उसे यह कहना ही पड़ेगा कि जिस प्रणाली का कोई ओर है न छोर (सिद्धांत विहीन है) उसको सरकार क्यों मान्यता दिए हुए है? क्यों जनतां के धन का दुरुपयोग हो रहा है?

वह भी कोई चिकित्सा प्रणाली है जिसमें टी. बी., केन्सर आदि तो क्या साधारण शीत व खांसी के निवाणार्थ ही कोई औषधि नहीं है।

दूसरी ओर होमियोपेथी के लिए कोई रोग असाध्य नहीं है, यदि रोगी में इतनी जीवनी शक्ति शेष है कि वह औषधि को स्वीकार कर सके।

डा. मेक कोलोलिन (Dr. Mc Coloughlin) ब्रिटिश हैजा अस्पतालों के मुख्य राजकीय निरीक्षक के शब्दों में "यदि हमको हैजा हो जावे तो हम अपना इलाज होमियोपेथिक डाक्टर से करायेंगे न कि एलोपेथिक डाक्टर से क्योंकि होमियोपेथिक इलाज के अन्तर्गत एलोपेथिक की तुलना में बहुत कम मृत्यु होती है।"

कुछ एलोपैथि डाक्टर खुद भी यह मानते हैं कि यदि राज्य की आर्थिक सहायता, राज्य शक्ति का समर्थन न मिले तो ऐलोपैथि शीघ्र ही लोप हो जाय क्योंकि इसके पीछे कोई सारतत्व नहीं है, प्रत्युत होमियोपैथि केवलमात्र अपने गुणों के सार आधार पर ही द्रुत लोकप्रिय होती जा रही है।

प्रस्तुत अंक में वर्णित उदाहरणों से आपको ज्ञात होगा कि ऐलोपैथि की स्थूल औषधियां कोई भी विषक्रिया से मुक्त नहीं है और मजे की बात तो यह है कि ऐलोपैथि विज्ञान में तीव्र विषाक्त औषधों की विषक्रिया की प्रतिषेधक कोई उपाय भी नहीं है। अतः विचारशील व्यक्ति दूरदर्शिता से काम लें और अनावश्यक ऐलोपेथि औषधियों से आत्म रक्षा करें।

—कृष्णचरण

आर्जेन्टम नाइट्रिकम (Argentum Nitricum)

मानसिक परिश्रम अथवा, दीर्घकाल बिमारी का सन्ताप ।
धीरे धीरे दुर्बल करे, शीर्ण शरीर पर पीड़ा की छाप ।।

अति द्रुत चले फिरे, अति द्रुत सब काम करे ।
दिन बहुत दीर्घ माने, कैसे भी समय न समरे ।।

आंखे हो सिन्दूरसी लाल, कीचड़ भरे जाल जंजाल ।
आँख की पीड़ा बारं बार, बायें शरीर का बुरा हाल ।।

हरी शब्जी सा हरा मल, फरफराती वायु निकले ।
पीले मल का भी हरा धब्बा कपड़ा न साफ धुले ।।

खाने पीने से वायु बने, स-शब्द डकार आती जाय ।
कहीं भी जाने को तैयार, टट्टी की हाजत हो जाय ।।

मीठा खाने का शौकीन, पर मीठा न पेट को सधे ।
सिर दर्द चक्कर आये, ज्यादातर बाँये को आधे ।।

संग्रहनी, अजीर्ण तथा आँख और गले की बिमारी ।
साथ रहे पीछा न छोड़े, इसी से सदा दुखारी ।।

आँख मूँदकर चलने पर, ठोकर खाकर गिरने का भय ।
ऊँचा देखें सिर घुमें, नीचे देखने पर, गिरने का भय ।।

रास्ता चलते दृष्टि का भ्रम, मकान के कोनों से न टकराय ।
संगम के समय पर ही, लिंग की शक्ति, शिथिल हो जाय ।।

ठंडक न बरदास्त हो, कपड़ा ओढ़ने से श्वास रुके ।
कैसी उलझन, कोई दवा बताओ, जो इन सबको मिटा सके ।।

कई साल पहले यदि होमियोपैथी की शरण लेता । *
केन्ट कहते सब दोष साफ होता आज ये हाल कभी न होता ।।

---

* आचार्य केन्ट ने अर्जेन्टम मेटालिकम के अध्याय में ऐसा लिखा है, परन्तु यह बात आर्जेन्टम नाइट्रेट के रोगी पर भी प्रयोज्य है । —सम्पादक

"Give true Homoeopathy free scope in the treatment of Humanity in the early formative periods of life and in a few generations T. B. Cancer, and insanity will disappear from the earth" —A. H. Grimmer M D.

नाना प्रकार की बिमारी में संकट काल की चिकित्सा

डा० चन्द्र प्रकाश, न्यु कालोनी, जयपुर

(गतांक से आगे)

Helleborus—(हेलिबोरस)

यह भी विरेट्रम जाति की ही दवा है परन्तु जिंक, विरेट्रम आदि के यथार्थ प्रयोग क्षेत्र समझने के लिये केन्ट की मेटिरिया मेडिका में इन तीनों दवा का अध्ययन करना अवश्य उचित है।

Hydrocephalus (मस्तिष्क शोथ), Meningitis (झिल्लीप्रदाह) आदि भयानक रोगों में इसका सचराचर प्रयोग क्षेत्र आता है। आजकल टाइफायेड, निमोनिया, ब्लडप्रेसर, सैपटिक आदि का विसदृश पद्धति से गलत उपचार करने के कारण प्रायशः इस दवा के प्रयोग का क्षेत्र बन जाता है।

विशेष लक्षण—

१. रोगी बिलकुल संज्ञाहीन अचेत
२. अनजान में भी दीर्घ श्वास
३. ठहरी हुई शून्य दृष्टि, पुतली फैली हुई, प्रकाश का भी ज्ञान नहीं होना।
४. अनजान ही कपड़े टटोलना, (अर्धज्ञान में एरम ट्राइफाइलाम, होयोसायेमास, वैप्टिसिया) नाक तथा होठ कुचरना।
५. माथे पर सलवट, ठंडे पसीने
६. अचानक कभी कभी चिल्लाना (एपिस)
७. तकिये पर शिर इधर उधर पटकना
८. कुछ चबाते रहने की मुद्रा
९. अज्ञान अचेत होने पर भी पानी पिलावे तो चम्मच को दांतों से पकड़ लेना
१०. एक हाथ और एक पैर का अपने आप चलते रहना एपोसाइनम (बांया हाथ पैर चलना-ब्राइयों, सिर्फ पैर चलाना–जिकम)
११. शिर कभी कभी इधर उधर घुमाने के बजाय पीछे खिंचा रहना, शिर पर कराघात करना।
१२. जीवनी शक्ति का एकान्त अभाव
१३. मांसपेशीयों का आक्षेप विक्षेप, खास तौर पर निद्रा में।
१४. हृद्पिंड का पक्षाघात
१५. मस्तिकशोथ, वक्षशोथ, उदरशोथ।
१६. मूत्र में गहरी लाल वालु
१७. अचानक सुइ चुभने का सा दर्द, ज्यादाकर बांयी कमर के नीचे
१८. असाध्य पेट दर्द के साथ दस्त तथा जी मिचलाकर उल्टी।
१९. मस्तक पर आघात लगने के कारण स्मृति लोप।
२०. आरक्त ज्वर के बाद अवशिष्ट अवसाद।

जिंकम इसका अनुपूरक तथा सहायक है। चायना तथा कैम्फर प्रतिषेधक।

इसकी एक खुराक उच्च शक्ति देकर धीरज से प्रति क्रिया का पर्यवेक्षण करना चाहिये।

ACID MUR (एसिड म्युर)

एसिडम्यूर भी कई प्रकार की उलझी हुई अवस्था में समलक्षण सूत्र के अनुसार प्रयोग होने पर नवीन जीवन संचार कर सकती है। इसके प्रयोग का क्षेत्र भी प्रायः मोतीझरा, सान्निपातिक ज्वर, विकार, दूषित गले का घाव, हैजा, डिफ्थेरिया उदरामय आदि में आ जाता है। कास्टिकम तथा आयोडियम की भांति यह दवा भी काली चमड़ी, काले बाल वाले व्यक्ति पर ज्यादा अच्छा काम करती है।

किसी भी बिमारी में इसके प्रयोग के लिये निर्णयात्मक लक्षण यह हैं:—

१. अर्ध चेतन या अचेतन अवस्था में भी कुन्हारते रहना।
२. नाड़ी धीर तथा दुर्बल, उठकर बैठने पर कमजोरी से आंखें मिच जाय।
३. अत्यधिक अवसाद और दुर्बलता के कारण तकिये पर यथास्थान नहीं रह सकता और स्वतः पलंग के नीचे की तरफ फिसलते रहना।
४. जीभ चमड़े के तरह सुखी हुई और छोटी हो जाय। जीभ मैली।
५. दुर्बलता के कारण पेशाब के साथ साथ मल भी निकल जाय, मल में दुर्गन्ध।
६. दाहिने करवट सोने पर सिर में चक्कर आवे इस वास्ते ज्यादातर बांये करवट ही सोये।
७. जबाड़े लटक जाय, ओठों के बीच में फटा हुआ, ओठ सूखे।
८. चिड़चिड़ा क्रोधी मिजाज।
९. तेज बुखार में प्यास नहीं परन्तु अन्य समय प्यास लग सकती है।
१०. सुबह १० बजे से शाम तक पेट खाली खाली मालुम होवे परन्तु फिर भी खाने की रुचि नहीं।

भावार्थ यह है कि इसमें दुर्बलता आर्सेनिक से भी ज्यादा होती है और रोगी अपने शरीर या मन पर से काबू खो देता है।

११. नाड़ी की तीसरी स्पन्दन लुप्त।
१२. भूख और प्यास लगे परन्तु खाने की इच्छा नहीं, मांसाहारी को भी मांस के नाम से शख्त नफरत हो जाय।

इसके अतिरिक्त यह दवा अन्यान्य लक्षण मिला कर सही प्रयोग करने पर—

छीकों के साथ नाक से खून बहना, कूकर खांसी, अत्यन्त कमर दर्द के साथ अत्यन्त दुर्बलता उत्पादक प्रदर स्राव, जीभ का लकवा, हर्निया, ध्वजभंग-नपुंसकता, सूतिका ज्वर, फोंतों में खुजली आदि में भी फलदायक होती है।

क्रम—३०, २०० आदि।

अत्यन्त अफिम खाने पर जो दुर्बलता हो जाती है उसमें भी यह अफीम की विषक्रिया को प्रतिशोधित करके लाभ पहुँचाती है। ब्रायोनिया, मर्क, रसटक्स आदि के बाद यह अच्छा

काम करती है। बवासीर, अदिठ व अन्य दूषित घावों में जब जलन, नीलापन आदि हो तो आर्सेनिक, लैकेसिस के साथ, इसका भी ध्यान रखते हुये तुलनात्मक विचार करना चाहिये।

ARSENIC Alb. (आर्सेनिक)

आर्सेनिक भी एक गभीर बहुमुखी क्रियाशील औषध है। मामूली जुकाम और फोड़ा-फुन्सी से लगाकर किसी भी बिमारी की कैसी भी अवस्था में लक्षणानुसार इसका प्रयोग होने पर यह अमृत का सा काम करती है।

निर्णयक लक्षण :—

१. मानसिक तथा शारीरिक अस्थिरता व बेचैनी।
२. निराशा के साथ साथ मृत्यु का भय।
३. अत्यन्त दुर्बलता के साथ शारीरिक व मानसिक अवसाद परन्तु फिर भी बेचैनी के कारण स्थिर नहीं रह सके।
४. थोड़ी थोडी देर में ही बार बार थोड़ा थोड़ा पानी पीने की प्यास।
५. दोपहर तथा मध्यरात्रि में पीड़ा की वृद्धि।
६. सेक, ताप आदि उत्ताप से अथवा कपड़ा ओढ़ने से सामायिक आराम, परन्तु ध्यान रहे कि सिर दर्द में ठंडे पानी लगाने से ही आराम बोध होवे।
७. शरीर के अन्दर तथा बाहर नाना प्रकार की जलन।
८. जीभ सूजी हुई सी, सूखी, मैली, लाल, अथवा किनारे लाल।
९. आंखें तथा मुंह पर सूजन, जीभ पर दांतों का निशान।
१०. खाने पीने की चीजों की सुगन्ध से जी मिचलावे (कालचिकम)।
११. सभी चीजों में विशेष प्रकार की बदबू का बोध तथा उसके साथ साथ श्वास कष्ट।
१२. आर्सेनिक का रोगी साफ सुथरा, शौकीन प्रकृति का होता है (Sulphur, Psorinum, Capsicum आदि के विपरीत) सब काम यथोचित ढंग से व सुव्यवस्थित रहना पसन्द करता है–अव्यवस्थित, गंदे वातावरण से उसको क्रोध भी आता है और मन में बेचैनी भी होती है। जैसे कि कोई तसवीर टेढ़ी टंगी हो, अथवा बिछौने की चद्दर उल्टी या टेढ़ी बिछाई हो तो उसकी बेचैनी बढ़ जाती है–चीजें इधर उधर तित्तर बित्तर फैली हो तो जबतक सब यथा स्थान पर नहीं रखी जायगीं उसकी बेचैनी शांत नहीं होगी।

उपरोक्त लक्षणों के साथ किसी भी बीमारी में आर्सेनिक अमृतमय काम करेगी। इसके अलावा कुछ सामान्य चमत्कारिक प्रयोग भी है—

यदि आइस्क्रीम या ज्यादा बरफ खाने पर पेट में दर्द हो जाय तो आर्सेनिक तत्क्षणत् लाभ पहुंचायेगी।

कुछ खाने या पीने मात्र ही वमन हो जाय, पेट में जैसे पत्थर मालुम हो, जिगर और तिल्ली बढ़ी हुई हो, पेट में जलन, बार बार घूंट घूंट पानी पीवे, आधी रात को पीड़ावृद्धि, टट्टी में जलन, बदबूदार काला रक्तस्राव।

दमें की हांफनि से सोना दुर्भर, सोते ही श्वांस बन्द होजाने का सा होना, इस वास्ते उठकर बैठ जाय और किसी चीज का सहारा लेकर सामने झुककर बैठे। विषाक्त गैस आदि से सांसरोध होकर मरणापन्न अवस्था में भी यह एकाएक लाभ पहुंचाती है।

आर्सेनिक दवा लेते हुये, शहद या गन्ने का रस कदापि नहीं लेना चाहिये। और यह दवा बार बार भी नहीं देनी चाहिये।

PYROGENIUM (पाइरोजेनियम)

सूतिका ज्वर, दूषित पानी पीने के कारण अथवा दूषित गैस आदि के कारण जब रक्तदुष्ट ज्वर (सेप्टिक–Septic fever) होजाय और इसी दवा का लक्षण हो तब एक मात्र यही दवा एकाएक भीषण मारणात्मक स्थिति पर काबू पा सकती है।

किसी भी स्त्री रोग में, यदि ऐसा इतिहास पायाजाय कि ५, ७ साल से सूतिक ज्वर होने के बाद से पुनः पुनः कुछ न कुछ बीमारी सताती रहती है, तो सबसे पहले इस औषध का प्रयोग आवश्यक हो जाता है, वरना अन्य दवा सुचारु रूप से काम नहीं कर सकती। जैसे टीके आदि के कुफल के निवारण के लिये, थूजा, साइलिशिया, जलने का कुफल निवारणार्थ कष्टिकम, आघातादिका कुफलके लिये आर्निका, कोनियम, हेलिबोरस, हाइपेरिकम, आदि सुम्पूर्ण आरोग्य में बाधा को दूर करती है इसी प्रकार विषाक्त ज्वर का कुफल दूर करने में यह दवा समर्थ है।

पुनः पुनः मोतीझरा, होता रहता हो और किसी दवा से निवारण नहीं होता हो तो १ या दो खुराक उच्च शक्ति की पाइरोजेन सारी मुश्किल को आसान कर देगी। इसके निर्णायक लक्षण—

१. ज्वर का ताप और नाड़ी की गतिका वैषम्य (the pulse is out of proportion with the temperature)
२. उच्च ज्वर में विकार में बहकना।
३. बार बार पेशाब हो परन्तु सख्त कब्जी, मल नहीं हो।
४. जिस करवट सोये उधर ही कड़ा बोध होवे और दर्द होवे, इस हेतु बार बार करवट बदले (आर्णिका, बैपटीसिया)
५. जीभ लाल या बादामी-वार्निस की सी कुछ चमकदार।
६. मुह का स्वाद मीठा तथा मुह में से पीप की सी बदबू
७. बहुत बदबूदार (Psorinum, Arnica) काला या बादामी मल के साथ वेदना-विहीन उदरामय (आर्सेनिक तथा एनआक्सिन में दर्द और जलन होती है)
८. नाक के दोनों पंख चलते रहें (Lyco, Antim Tart)
९. उल्टी भी काली, बादामी बहुत बदबूदार
१०. नाना प्रकार की अजीब कल्पना और गल्त विचार। अपने आपको सहस्त्रबाहु समझना।
११. लैकेसिस के तरह होश में अथवा बेहोशी में भी बहुत बोलना।
१२. अपने दिल धड़कने के बारे में अत्यन्त सचेत

इसकी खुराक पुनः पुनः अथवा जल्दी जल्दी नहीं देनी चाहिये। प्रायः 1M, 10M, या 50M की एक खुराक ही पर्याप्त होती है। ब्रायोनिया, रस टस्क, आर्सेनिक, साइलिशिया आदि के आगे या पीछे भी दी जा सकती है।

उपरोक्त औषधियों के अतिरिक्त और भी ऐसी अनेक दवा हैं जो अवस्थानुसार अनेक अनेक संकट काल में तत्काल सहायक सिद्ध होतीं हैं, जैसे कि Thuja (थूजा), Psorinum (सोरीनम), Sulphur (सल्फर), Hepar Sulph (हिपर सल्फ), Tuberculinum (ट्यूबरक्युलिनम), Medorhinum (मेडोरीनम), Crotalus (क्रोटेलस), Malandrinum (मलेन्ड्रीनम) आदि आदि।

परन्तु इसके साथ एक और सावधानी की बात कह देना उचित होगा कि यक्ष्माकी वर्धित अवस्था में अथवा किडनी, हार्ट, लिवर, फेफड़ा, मूत्राशय आदि की यान्त्रिक विकृत अवस्था में–Kali Carb, Phosphorus, Silicea, Hepar sulph, Sulph, Tuberculinum आदि का प्रयोग खतरे से खाली नहीं है तथा अन्य औषधियां भी निम्नक्रम में ही प्रयोग करते हुये धीरज से काम लेना उचित है।

मेडोह्निनम् (Medorrhinum)

कभी कभी अन्तिम अवस्था में यह दवा भी एकाएक जादू का सा काम करती है–परन्तु इसका प्रयोग बहुत ही दीर्घ विवेचन के बाद होना चाहिये–इसकी उच्च शक्ति की (1M, 10M,50M अथवा C.M.) केवल एक ही मात्रा देकर धीरज से पर्यवेक्षण करना चाहिये।

इसका रोगी क्रोधी तथा भूलने स्वभाव का होता है, कद में छोटा बुद्धि विचार कम।

सलफर, कैलकेरिया, लेकेसिस, पेट्रोल, कैमोमिला, सैगुनेरिया, सनिकुला आदि की तरह इसका हाथ पांव में जलन या गर्मी बोध होती है।

कार्बोवेज की तरह सदा पंखे की हवा का आग्रह, विरेट्रम की तरह ठंडे पसीने में तर। और इसके साथ साथ यदि रोगी अथवा रोगी के माता पिता को प्रमेह (Gonorrhoea) होने का इतिहास मिले तो आप पूर्ण विश्वास के साथ सदैव १ खुराक उच्च शक्ति मेंडोरिनम दे दें।

यह एक कच्छुदोषनाशक यानी Anti Sycotic दवा है, रोग या रोगी के वंश इतिहास में, दमा, श्वास, गठिया आदि की बिमारी का इतिहास भी कच्छुदोष सूचित करता है।

इस लेख की भूमिका में वर्णित संकटापन्न अवस्था में जीवनीं शक्ति के अत्यधिक दुर्बल अवस्था में जो दवा एकाएक जीवनी शक्ति को पुनर्जीवित करने में सहायक होती है उनमें से कुछ का वर्णन यहां किया गया है—यह पहले भाग के ही अन्तर्गत है इसके बाद लेख के दूसरे भाग में विशेष विशेष बिमारीयों की विशेष विशेष अवस्था में काम आनेवाली अन्य दवायों के सुचारु प्रयोग के बारे में विवेचन करेंगे—वो हरेक बिमारी के नाम से एक एक अलग अध्याय होगा और धारावाहिक रूप में प्रकाशित होता रहेगा।

परन्तु दूसरा भाग प्रारम्भ करने से पहले यह स्पष्ट कर देना आवश्यक है कि जैसे रोगों की अवस्था असंख्य प्रकार की होती है वैसे ही होमियोपैथिक चिकित्सा शास्त्र भी असीम है तथा औषधियां भी अनेक अनेक है, जिसके असंख्य लक्षणों का ज्ञान प्राप्त करना

तथा उन अनेक औषधियों के अनेक शक्ति स्तर का प्रयोग जानना जन्म भर की निरन्तर साधना साध्य है–अतः किसी सामान्य लेख को सम्पूर्ण नहीं समझना चाहिये। इन लेखों का उद्देश्य तो केवल सामान्य साधारण निर्देश के साथ साथ पाठक में और पाठ व अनुशीलन करने की रुचि और आग्रह पैदा करना है।

क्रमाङ्क 5585/GEC/59/II • दिनांक २२–४–१९५९.

"भावी आम चुनावों में अमिट स्याही के बदले चेचक के टीकों का सुझाव त्रुटिपूर्ण है"

हिन्दुस्तान, नई दिल्ली, दिनांक १६-४-१९५९ के पृष्ठ क्रमांक १, कालम ४ में "भावी आम चुनावों" के सम्बन्ध में निम्न प्रकार का सुझाव चुनाव आयोग द्वारा प्रस्तुत होकर प्रकाशित हुआ है। डॉ० एन० पी० सिंह, सेक्रेटरी द्वारा कार्यकारिणी समिति की बैठक दिनांक १९-४-१९५९ में विचारार्थ पढ़कर सुनाया गया।

सुझाव इस प्रकार है :—

"भावी आम चुनावों में अमिट स्याही के बदले चेचक के टीके लगेंगे"

नई दिल्ली, १५ अप्रेल। यदि चुनाव आयोग का सुझाव मंजूर हुआ तो भावी आम चुनावों में जाली मतदान को रोकने के लिये अमिट स्याही के बदले चेचक के टीके लगेंगे। भारत सरकार ने इस प्रश्न पर राज्य सरकारों की राय मांगी है, और अब बहुत कुछ उनकी राय पर निर्भर करता है। आशा है कि चुनाव आयोग द्वारा बुलाई जाने वाली राजनीतिक दलों की बैठक में इस विषय पर विचार विमर्श होगा।

सेक्रेटरी महोदय की ओर से चेचक के टीके के सम्बन्ध में अन्य देशों में क्या क्या प्रतिक्रियाएं हुई उनपर भी प्रकाश डाला गया। सर्व सम्मति से निश्चित हुआ है कि :—

१. "यह प्रणाली होम्योपैथिक चिकित्सा सिद्धान्त के विरुद्ध है तथा विशेष लाभदायक नहीं है और कई देशों में इस प्रणाली पर रोक लगा दी गई है। यह निम्न कारणों से स्पष्ट है:—

(अ) ब्रिटिश पार्लियामेन्ट ने एडवर्ड जैनर को टीके के अनुसंधान के उपलक्ष में वर्ष १७९८ ई० में तीस हजार पोण्ड दिये तथा सन् १८५३ में विशेषरूप से सन् १८६७ से पार्लियामेंन्ट ने चेचक का टीका लगवाना अनिवार्य कर दिया। सन् १८५७, ५८, ५९ में चेचक का रोग संक्रामक रूप से फैला, जिसमें १४,४२२ व्यक्तियों की मृत्यु हुई। मगर जब चेचक के टीके लगवाना विशेषरूप से अनिवार्य कर दिया गया उस समय सन् १८७०, ७१, ७२ ई० में इंगलैंड व वेल्स में मृत्यु संख्या ४४, ६३१ पर पहुंच गई। इसका परिणाम यह हुआ कि ब्रिटिश पार्लियामेन्ट ने इस कानून को वापिस ले लिया।

(ब) डा० जे. एफ. मारमन एफ. आर. सी. एस. इनचार्ज लन्दन पाक्स हॉस्पिटिल ने रेनाल्ड सिस्टम्स आफ मेडिसन्स में व्यक्त किया है कि चेचक के टीके लगाये जाने के उपरान्त रोगियों की संख्या १९ वीं शताब्दि में ५ प्र०श० से बढ़कर सन् १८६५ ई० तक ४४ प्र० श० तक पहुंचाई, सन् १८५५ से ६३ प्र० श० सन् १८७५ में ७८ प्र० श० तथा सन् १८८५ में ९६ प्र० श० बढ़ी तथा रोगी अस्पताल में भर्ती हुए।

(स) जार्ज वर्नाडशा ने अपनी पुस्तक में (Everybody's Political What is what) में चेचक के टीकों के विरुद्ध एक स्थान पर लिखा है कि टीके अनिवार्य रूप से लगाने का कानून जब तक वापिस नहीं लिया गया, जब तक कि मजिस्ट्रेट महोदयों ने निर्दयता पूर्वक इस कानून को अमल में लाकर जनता को पीड़ित ही न कर दिया, बल्कि विद्रोह खड़ा कर दिया जिसके आगे ब्रिटिश पार्लियामेन्ट को झुकना पड़ा। उन्होंने आगे यह भी लिखा है कि समस्त वैज्ञानिक प्रजा पीड़क शासन उस समय असहनीय हो जाते हैं जब उसके निष्ठुर हाथ हम और हमारे बच्चों पर पड़ते हैं और नसों के अन्दर जहरीले इन्जेक्शन और ऐसी ही औषधियां हमारे गलों के अन्दर जबरदस्ती उतारी जाती हैं।

(द) ब्रिटिश पार्लियामेन्ट ने नेशनल सर्विस बिल के अन्तर्गत सन् १९४६ में यह पारित किया कि इग्लिश चेचक के टीके के कानून निरस्त किये जाते हैं, ब्रिटिश सेना, जल सेना, रायल एयर फोर्स तथा ब्रिटिश सिविल सर्वेन्टस के लिये चेचक के टीके लगवाना ऐच्छिक किया जाता है, अगर इनके कर्मचारी चाहे तो चेचक के टीके लगवाने से इन्कार कर सकते हैं।

(क) रायल होम्योपैथिक अस्पताल लन्दन में चेचक अवरोधक औषधियां प्रयोग कराई गई, लगभग शत प्रतिशत उपयोगी पाई गई।

२. पाकिस्तान में होम्योपैथी के समर्थकों ने अपनी वार्षिक सामान्य कान्फ्रेन्स में जो ५ जनवरी १९५९ को हुई थी उसमें यह प्रस्ताव पारित किया है कि पाकिस्तान शासन ने जो चेचक के टीके लगाने का कानून बनाया है उसे उक्त पैरा १ के अन्तर्गत दिये हुए कारणों से उचित नहीं समझती और होम्योपैथिक औषधियों के द्वारा चेचक रोग का अवरोध किया जावे, ऐसी अपील करती है।

३. चुनावों में वोट देने के अधिकारी केवल २१ वर्ष की आयु के व्यक्ति है। इस आयु के व्यक्तियों को चेचक का टीका लगाना भी कोई लाभदायक नहीं है।

४. चेचक का टीका चुनाव के समय अगर लगवाया जावेगा तो निम्नलिखित कारणों से अनुपयोगी सिद्ध होगा।

(अ) चेचक का टीका चुनाव के दिन लगाने की व्यवस्था की गई, तो हजारों व्यक्तियों को हवा लगाने के लिये न तो नीडिल ही स्टेरिलाइज हो सकेगी और

न ताजा सीरम ही इतनी अधिक तादाद में प्राप्त हो सकेगा। इसका परिणाम यह होगा कि मानव शरीर पर त्रुटिपूर्ण टीकों का कुप्रभाव पड़ेगा।

(ब) चेचक के सीरम अगर लगाते ही किसी व्यक्ति ने पोंछ दिया तो उसका प्रभाव नष्ट हो जावेगा।

(स) टीका लगाने के तुरन्त उपरान्त वोट देने जाने पर, यह भी सम्भावना है कि चुनाव अधिकारी को वह निशान स्पष्ट नजर न आवे।

(द) टीका लगाने से परहेज करनेवाले व्यक्ति वोट देने आवेंगे, इसमें भी सन्देह है। अगर ऐसे व्यक्ति टीके के भय से वोट देने न गए, तो देश की नागरिकता व स्वतन्त्रता को आघात पहुंचेगा।

अतः पाश्चात्य देशों के अनुभव तथा चेचक अवरोधक होम्योपैथिक औषधियों के प्रभाव को देखते हुये, हम एसोसिएशन की कार्यकारिणी समिति के सदस्य चुनाव आयोग के उक्त सुझाव को जनता के स्वास्थ्य की दृष्टि से अहितकर समझते हैं, तथा चुनाव आयोग व मध्यप्रदेश शासन से प्रार्थना एवं अनुरोध करते हैं कि इस प्रणाली को न अपनाया जावे।

(डा० एन. पी. सिंह)

NEWS AND VIEWS:

Celebrations of the 204th Birthday Anniversary of Dr. Samuel Hahnemann.

As numerous items of news in respect of Hahnemann's 204th Birthday Celebrations, Annual Elections and Reports, All India Congress and conferences at various places; have been received from all over the country, it is not possible to incorporate all in this issue of the magazine within the limited number of pages allotted to the News and Views section and hence we are obliged to publish only some of them in synopsis.

—Editor.

Canara Homoeopathic Association 204th Birthday Celebrations:—Celebrated the birthday at the S. C. C. Bank Hall at Kadialbail under the presidentship of Sri S. Narsappaya B.A.B.L., M.L.C. The function was attended by the elites of the city and dignitories like.—Dr. K. Sridhar Rao, L.R.C.P.S. (Edin), L.M. & S. (Madras), Dr. Appukutta Menon, Sri K. A. Swayamprakash, B.Sc., F.R.C.S. (Lond.) Spoke on the life of the master and the achievements of Homoeopathy.

Churu District Homoeopathic Association:—Presided by Sri Basudev Krishna Joshi, Ex-Chairman, Municipal Board, Churu. Drs. Om Prakash Sharma, Sahityaratna, Dr. Nanuram Sharma, Dr. Om Prakash Sharma, Prabhakar etc. spoke on the occassion.

Nimar Homoeopathic Association, Khandwa (M.P,):—Presided by Sri P. Subhrao, Advocate. Dr. S. S. Jhawar, Sri Abdulla Bhai and Sri P. Subharao etc. spoke on the occasion.

The Central Homoeopathic and Biochemic Association, Gwalior: - Presided by—Sri Santprakash Gupta, B.A.

Akhil Rajasthan Homoeopathic Doctors' Association, Bikaner:—Dr. Jiwan Ram Vyas, Rajvaidya, presided.

The International Hahnemannian Society of India:—Celebrated their Silver Jubilee at the Budhist Hall, Calcutta on the 30th January 1959. It was attended by great many dignitories. Dr. S. Seal, delivered an excellent speech on the recent development and onward march of Homoeopathy.

The Saurashtra Homoeopathic Medical Association, Rajkot:—Held their annual general meeting on the 15th March, 1959 and presented a very lengthy Annual report indicating very encouraging and promising achievements of the Association since its formation on the 24-11-53. The following were elected as the office bearers for the year 1959—

President	...	Dr. Manilal, H. Udani, M.A., L.L.B., M.D.H. (Cal.)
Vice-President	...	Dr. S. N. Joshi, L.M.S.H.
Hon. Secretaries	...	Dr. Maganlal H. Bhatt, M.B.H., R.M.P.
		Dr. Arun Kant M. Udani.
Members	...	Dr. M. K. Oza, R.M.P.
		Dr. Maganlal H. Vyas.
		Dr. Girdharial S. Ganatra.
		Dr. J. C. Sarcar.
		Dr. R. S. Rathod.
		Dr. E. C. Cooper,
		Dr. N. M. Trivedi.

Khandwa 1-5-59 :—The executive body of the Nimar Homoeopathic Association, in its meeting of 30-4-59 unanimously decided to establish a charity fund for opening a charitable homoeopathic dispensary. It is decided to put three charity boxes at the clinics of Dr. S. S. Jhawar, Dr. G. P. Sharma and Dr. B. L. Jhawar. The amount, thus received will not be used for association's routine work.

भाटिया होमियो इन्स्टीट्यूट, स्टेशन रोड़, बीकानेर

इस संस्था का उद्देश्य होमियोपैथिक विज्ञान का व्यापक प्रचार एवं होमियो प्रेमी मात्र से सम्पर्क बढ़ाकर इस चिकित्सा प्रणाली द्वारा प्राणी मात्र की सेवा भावनाओं को गांधी मतानुसार जनजीवन में जागृत करना है।

इस संस्था द्वारा आधुनिक ढङ्ग पर घर बैठे भी शिक्षा देने का प्रबन्ध, विद्यार्थी की सुविधा को ध्यान में रखकर किया जाता है। अल्प समय में ही होमियोपैथी का पूर्ण ज्ञान कराकर भारत सरकार द्वारा रजिस्टर्ड कॉलेज का डिप्लोमा दिया जाता है। इस संस्था के निःशुल्क चिकित्सालय में विद्यार्थीगण प्रेक्टिकल ज्ञान निःशुल्क प्राप्त करते हैं।

NUCLEAR BASIS OF HOMOEOPATHIC PHARMACY

By

Dr. F. Raschied, F.R.H.S. (Calcutta) *Director, Pakistan Academy of Homoeopathic Science, Member, Pakistan Association for the advancement of Science, Member, Association of Scientists and Scientific Professions, Karachi. Chairman, Bureau of Organon All-Bengal Homoeopathic Conference, Calcutta (1938) etc. etc.*

READ AT

The Third Pakistan Pharmaceutical Conference (Homoeopathic Section) held at Karachi from April 17 to 21, 1959.

(ABSTRACT)

History of Medicine is written in the roster of pharmaceutics. Every stride in pharmaceutics bespeaks of a step farther or a pace quicker in therapeutics and diagnostics. Until the advent of Hahnemann Medicine was a subject saturated with material contents; so was its mate pharmaceutics. This material concept of Medicine and Pharmacy gave birth to and sustained poly-pharmacy, crude posology, mid-way pathology and inconclusive diagnostics. The vital-operation of the organism is quite anti-thetic to and incongruous with such concepts. Between the means and the end no missing link can make comprehension. reason and purpose defined and stable. Pharmacy is the means, therapeutics the end and dynamism of matter, whether organic or inorganic, is the link that adjusts their (organic and inorganic matters) behaviour in weal or woe, in harmony or riot.

Hahnemann for the first time in medical history and also in higher physics postulated that vitality in organism and 'hidden, slumbering, dynamic energy' in ordinary matter (both organic or inorganic) are responsible for series of activity called health and disease in relation to the former and pathogenesy and cure in relation to the later. He further pre-dated Dalton by pronouncing his Atomic Theory seven years before the later.

Hahnemann's this Theory of 'hidden, slumbering, dynamic energy' is the corner stone of Homoeopathy, it governs its pharmacy, therapeutics, principle, diagnostics and philosophy.

The method employed in releasing out the dynamic energy of the drug consists of applying sucussion, in case of fluid substances and trituration in case of dry or solid substance, to a given mass of drug-substance held in finely divisible and preservative indifferent substance termed vehicle. The ratio between the given drug and its vehicle is kept constant at every stage of this energy-releasing operation.

In both these pharmaceutical procedures FRICTION is the force utilized. This force of FRICTION produces two-fold simultaneous effects viz. pressure and heat. By pressure the drug-mass loosens out its bond and the particles get freed; by heat the freed particles move further apart from each other in the indifferent vehicle. Every stage of the operation asserts pressure on and incites heat to the particles to affect one more degree of activity. This whole process or operation is called Dynamisation and the latent degree of activity in the drug particle is called Potency in Homoeopathy.

Like FRICTION another essential in homoeopathic pharmacy is the change of vials or vessels at every stage of dynamisation. By this any chance of interference by the adhering particles on the walls of emptied vials shall have been dispensed with and uncertainty in the precision of the potency, therefore, will be totally ruled out. This is in consonance with Heisenburg's "Principle of Uncertainty".

In support of what Homoeopathic Pharmacy stands for maintains and produces modern Nuclear Physics, Biology and Medicine can be called upon to show enough materials to corroborate them, Besides the researches of a host of eminent scientists C. V. Raman's wave-particle discourse, Plank's Energy-Constant, Charles Henery's studies of "Biological Resonators" and McDonough's observations of the inter-action between the therapeutic agent and the human organism can be cited to prove that Homoeopathic Pharmacy by its peculiar method of dynamization reduces a drug into wave-concentrates of intense velocity that under given eircumstances call out the residum of disease-force in a given patient in order "to restore the sick of health" and that too gently, rapidly, completely and permanently.

The 5th All India Congress convened by the All India Institute of Homoeopathy was held on 18th & 19th of April, '59 at Patna, under the presidentship of Dr. Maganlal B. Desai, H.M.B., (Bombay-Surat).

Dr. Jaya Prakash Narayan inaugurated the congress. The following is the extract of the news as published in the Sunday Indian Nation, Patna, April 18, 1959.

Government urged to review policy towards systems of Medicine.

Patna, April 18. Mr. Jaya Prakash Narayan urged the Government today to review its policy towards various systems of treatment and to take a more scientific view of the situation.

He was inaugurating the All India Homoeopathic Congress session held in the Legislators' Club here this morning. About 200 delegates from all over the country are participating in the Congress.

The policy decided upon by the Government in 1948 said 'modern scientific medicine' would be the basis of all national health programmes. By this Mr. Narayan said the authorities probably had in mind Allopathy.

This the Sarvodaya leader added was entirely wrong. He can never say that Ayurvedic or Unani or Homoeopathic systems have no scientific basis. This amounts to favouritism. Bigger persons with higher social status and power are connected with Allopathy and they might very well be affecting the Government policy towards other forms of medicines. "I think these factors and not scientific considerations have weighed with the authorities in adopting this attitude towards Homoeopathy", he added.

Allopathy has not proved that other systems are unscientific and more-over, if these systems have had no scientific they could not have continued for centuries as they have done.

Mr. Narayan said that even the idea of integration of various systems was unscientific. All systems should grow and develop independently and while they grow they may adopt something of other systems too.

So many committees and sub-committees have been formed and they have submitted their reports but all have been shelved. Mr. Narayan urged that all those reports should be implemented and if necessary a Bill should be adopted by the Parliament safeguarding the rights and duties of various forms of treatment. He called upon the Government to adopt an All India policy based on scientific grounds over this issue.

The Sarvodaya leader expressed his wholehearted sympathy and support to the demands of the Homoeopathic Congress and assured that he would do whatever he could to get their demands accepted.

Messages of good wishes were read out as received from Rashtrapati Sri Dr. Rajendra Prasad, Dr. Radha Krishnan, Vice President of India, Shri D. P. Karmarkar, Union Minister of Health, Shri K. C. Reddy, Union Minister for Works, Housing and Supply, Shri Satyanarain Sinha, Minister for Parliamentary Affairs, Deputy Minister Community Development and Co-operation, Shri G. L. Nanda, Planning Commission, New Delhi, Shri S. K. Patil, Minister of Transport and Communication, Shri Jagjiwan Ram, Minister for Railways and Shri V. V. Giri, Governor, Uttar Pradesh.

The following resolutions were adopted at the 5th All India Homoeopathic Congress held at Patna on 18th and 19th April, 1959.

1. Resolved that this A. I. Homoeopathic Congress regrets to find the Union Government still adhering to their Health Policy declared as early as 1948 as a result of which the Government is not implementing the recommendations of the Homoeopathic Enquiry Committee, the Planning Commission, the Ad Hoc Committee, Advisory Committee and the Dave Committee for the proper development and statutory recognition of Homoeopathy in India.

The Congress further expresses its sense of dissatisfaction on the appointment of a fresh Committee known as the Mudaliar Committee for the purpose of integrating Homoeopathy and Indigenous systems of medicine into the Modern Medicine contrary to the recommendation of various committees previously constituted by the Central Government from time to time.

The Congress appeals to the Union Government to implement the recommendations of the Planning Commission and the Dave Committee immediately.

2. Resolved that this Congress urges upon the Central Government to enact a Homoeopathic Bill on an all India basis with a view to bring about uniformity in the Homoeopathic legislative enactments passed already in ten out of fourteen states of the Indian Republic and solve the problem of reciprocity in registration in different states of India.

3. Rosolved that this Congress expresses its deep sense of resentment at the attitude of the West Bengal Government in deferring the proposal of legislative enactment for Homoeopathy by the Chief Minister himself in the state Assembly.

The Congress earnestly appeals for an early enactment of a Homoeopathic Bill by the West Bengal Government in view of the fact that Bengal is considered to be the home of Homoeopathy in India and that it is possible to start fully equipped Homoeopathic institutions with properly qualified teachers for Homoeopathic and non-homoeopathic subjects in diploma and degree courses of study there.

4. Resolved that this Congress places on reeord its sense of deep disappointment and dissatisfaction for not setting up a Homoeopathic college and Hospital at Patna even though the Bihar State Government has earmarked funds for the purpose during the second Five Year Plan period. The Congress earnestly appeals to the Bihar State Government to make immediate arrangements for starting the said institution as three years of the 2nd Five Year have already passed.

5. This Congress places on record its senre of satisfaction at the progressive steps being taken by the U. P. Government in promoting the cause of Homoeopathy further by the upgrading of the Lucknow Homoeopathic Medical College to the degree standard. This Congress urges upon the State Government to get the said college affiliated to some University at an early date and thereby avoiding an anomalous state of affairs.

It further resolves to send a deputation to the Chief Minister and Health Minister of U. P. for putting up the whole matter before them.

6. Resolved that this Congress appreciates the attitude of the Bombay State Government towards Homoeopathy and urges upon the State Government to provide

more facilities financial and otherwise for clinical teaching of Homoeopathic students in Bombay.

7. Resolved that this Congress places on record its deep sense of disappointment of the action of Union Government at the setting aside of the recommendation of the Planning Commission and the Homoeo Advisory Committee regarding the constitution of a pharmacopea committee and appeals to Government to reconsider their policy and appoint the committee immediately.

Dr. K. L. Saxena, General Secretary of the All India Institute of Homoeopathy presented his report revealing valuable facts and concluded his address with the following—

"After working for the state recognition and betterment of Homoeopathy for more than 20 years, I have come to the definite conclusion that the time has come when we should discard all our attitude of complacency and stand on our own legs. The days of petitioning and begging have gone far behind. This is an age in which we think of direct actions; strong organisations and united stand. We will have to work hard and make considerable sacrifice for the uplift of Homoeopathy in right earnest otherwise the future is absolutely doomed. Our problems have got to be tackled from two definite points of view. There should be a clear agitational approach by the Institute to give a strong agitation to the Government. And there should be a regular constructive approach just to prepare a sure footing, and a reliable back-ground to an overtaking struggle against the professional as well as the State antagonism to the Homoeopathy".

V. P. Verma, Criticises Govt. Attitude to Homoeopathy.

Patna, April 19, 1959, "Inaugurating the Bihar branch of the Society for the Advancement of Homoeopathy at Patna today Shri V. P. Verma, Speaker of the Bihar Legislative Assembly said that Homoeopathy had rendered service to the humanity in sharp contrast to the allopathic system of medicine. Allopathic system, he said often took recourse to the trial and error method and treated patients as if the human body was a laboratory".

Shri Verma criticised the discriminatory attitude of the authorities towards Homoeopathic system of medicine. He was of the opinion that all the systems of medicines should be allowed to flourish as separate entity and remarked that integration of systems of medicine was not feasible."

A. I. Homoeopathic Service. Press Appealed for Gallup Poll.

"At a press conference last evening Dr. B. K. Sarkar of Calcutta, the eminent exponent of Homoeopathy and Dr. K. G. Saxena, Homoeopath physician to the President of India and General Secretary of All India Institute of Homoeopathy, made a fervent appeal to the press in India on behalf of the Institute to hold a gallup poll to determine the popular will whether an all India homoeopathic medical service was desired or not.

The two spokesmen of the Institute who visited Patna in connection with the 5th All India Homoeopathic Congress held here, described how the Government of India stuck to their policy on health service decided as early as in 1948 recognising allopathy as the basic system of medicine. Several Committees were set up but their recommendations were invariably shelved and now, perhaps in order to break the stillness, another committee was being set up to enquire whether an integrated system of

medicine could be brought about. This was being done inspite of authoritative protests that such synthesis is impossible in conception and can only lead to the obliteration of the other systems, thereby by-passing the popular demand.

They also revealed that while the top most leaders of the Governmenr individualy accepted Homoeopathy as a good and dependable syslem the policy of the Government was self contradictory. There was stonewall, they pointed out, which bars the recognition of Homoeopathy but does not meet the eye.

There has been enough of technical discussion, they said, and the hour had arrived when people in general should be allowed to say without any bias what they wanted. Common people have the greatest evidence with them as they go to any 'Pathy' for relief and cure and can say straight away where they got those.

They stressed that the press in India could hold gallup polls on the issue in bringing to fore the people's verdict.

Dr. B. K Sarkar, M B. (Cal), D.M.S , Editor, Homoeopathic Herald, presiding over the scientific session of the Congress delivered a very long, learned and informative speech emphasising the need of continued research works in Homceopathy and gave some constructive suggestions.

The South Indian Homoeopathic Conference organised by the Madras Presidency Homoeopathic Association was held at Madras on the 28th March, 1959.

The conference was inaugurated by Dr. N. M. Jaisoorya, M.D., and presided by Dr. V. V. Athalye.

Dr. Jaisoorya delivered an explosive speech condemning the attitude of the allopaths and the Govt. and in conclusion said—

"One thing is certain, neither Homoeopathy nor the alleged quack can be any more wiped out in India. At best they both be improved if the Government stops its double dealings. Either leave us alone and we shall manage things as best as we can or come straight and cooperate with us in what we are trying to do. The choice is upto them. We don't beg for favours. Only stooges do that and we do not intend to be stooges since we have no need for that. What is more, I want the Government and the Homoeopaths to realise that Homoeopathy can develop only as long as the amateur, the keen lay practitioner and the better type homoeopath combine in close cooperation. A purely professional organisation, as history shows, deteriorates into a trade union as even the allopathic medical bodies glaringly demonstrate. In India it is inevitable tha the lay practitioner will preponderate for many years to come and it is desirable that we should welcome it. Otherwise, Homoeopathy will never become the People's medicine which we are aiming at. I therefore have very little regard for the cliams of certain bodies who claims superiority because they are professionals. My experience is that some of these have lent themselves to be exploited by Government for their own selfish ends. If we keep these facts in mind we will have before us an enormous task and heaps of things to do to keep us active, even without the aid of the Government or even against its active opposition, as we are finding in Andhra."

President Dr. Athalye also delivered a very learned and informative speech concluding the same with some constructive suggestions. He categorically chalked out the demands of the Homoeopaths and our future programme as under—

OUR DEMANDS

"Now I come to the demands which we are to make.

1. As Homoeopathy is a scientific system of Medicine it should immediately get recognition from the state Government.

2. State Government should itself start one model Homoeopathic College with a hospital for adequate training of those who would like to learn and practise Homoeopathy; or in lieu of it, the State Government should liberally help a private institution undertaking to start one. At least in the third five year plan the Central Government should make a provision for such help.

3. In view of poor economic conditions of India the course of such a college should be, for some time to come, a licentiate course of four years after matriculation.

4. A seperate Board and a seperate Faculty should be constituted for the Homoeopathic System of Medicine in every stage for the purposes of registration of practitioners, maintenance of medical ethics, recognition of institutions, prescribing courses of training, holding and regulating examinatians and performing such other duties as come within the purview of a Board and a Faculty.

5. Private institutions should be given an opportunity to reach a required standard step by step as was done in the case of Ayurvedic and Unani ones.

6. Persons who have been practising Homoeopathy for a period not less than ten years before a Homoeopathic Act comes into force should be entitled to be registered in the register of registered Homoeopathic practitioners; and those who have been practising Homoeopathy at least for two years before the Act comes into force should be enlisted in the list of Homoeopathic practitioners.

7. The Government should create a cadre of social workers and health visitors trained in this system of Medicine for the benefit of the sick in rural areas.

8. Persons who are neither registered nor enlisted may practice Homoeopathy in rural areas where no registered practitioner has commenced his practice.

9. An independent central Council for Homoeopathy should be established at an early date with representatives on it from all states having Homoeopathic institutions.

10. Post-graduate training institutions or centres should be estahlished where batches of efficient lecturers and professors will be prepared. The Government of India has already decided to have such a centre at Bombay .. But it must hurry up matters in the interest of students studying in undergraduate colleges.

OUR FUTURE PROGRAMME

Most important items in this programme would be :

"*First* : —To institute our own Enquiry Committee. We are grateful to the Central Government for having appointed the Homoeopathic Enquiry Committee in 1948 and the Dave Committee afterwards on the Government level with its own terms of reference. But it is absolutely neeessary to form our own Enquiry Committee with our own terms of reference. Because we ourselves are to solve our problems and difficulties, though with the help of the Government such a Committee should visit

all Homoeopathic institutions existing in India and if feasible those existing in other countries also.

Second :—To bring about at an early date merging of all existing Homoeopathic Associations into one new All India Homoeopathic Association, as I have been advocating since 1954. Usefulness of such a step has been supported from different platforms. We should not now tarry long in taking this most desirable step.

Third :—To arrange refresher courses for Homoeopathic practitioners who have no institutional training but who will be allowed by the Government to practice Homoeopathy under certain conditions. Refresher courses are found useful even by institutionally trained persons, though they are conducted on a level higher than that for the untrained persons. For they help the practioners to be acquainted with the latest developments and advances in the medical field.

Dr. P. Shankaran, L. I. M. D. F. Hom. (Lond.), Hony. Physician, Govt. Homoeopathic Hospital, Bombay, Chief Editor, Journal of Homoeopathic Medicine, presiding over the scientific session of the South India Homoeopathic Conference, Madras, March 1959, delivered a speech entitled "our needs and our responsibilities," which is worth Consideration.

Book Review :—

"Good Eyes without glasses" in English, Price Rs. 4 /- and " नेत्र चिकित्सा " in Hindi-Price Rs. 3 / -.

Publishers :—Kumar Publishers, 28 Abbott Road, Lucknow. Also available at - Krishna Eye Clinic, 28, Vidhan Sabha Marg, Lucknow (U.P.)

Both the English and the Hindi versions of the book are excellent, rich in valuable matter, good print and get up. The author has shown his philanthropic approach to the problem of human suffering in respect of eyes and has expostulated the scientific method of maintaining good eyesight, protecting the normal eyes on the one hand and curing almost all eye diseases on the other hand without any medical aid or even spectacles. This shows his selfless service to the humanity.

We recommend the book to one and all.

We hope to publish in the next issue of the TORCH an article by the author on "Prevention of Myopia in schools".

Journal of Homoeopathic Medicine :—

A quarterly Journal of high standard, having an Editorial Board of a galaxy of the top ranking Homoeopathic luminaries from all over the world headed by the Chief Editor, Dr. P. Sankaran, and published by him for the Homoeopathic Corporation. 13-A, Station Road, Santa Cruz (West) Bombay-23. Annual subscription Rs. 3/- only.

The Athurasramam Homoeopathic Medical College Magazine, Sachivothamapuram, Kottayam, Kerala State, India. It is also a Magazine of quite high standard, edited and published by the Principal of the College Dr. R. P. Patel. We have high hopes for the College and the Magazine.

WORLD HOMOEOPATHIC MEDICAL CONGRESS
2nd CONVENTION.

General Dr. Amaro Azevedo
Executive Secretary and
President of Hahnemann Institute
Caixa Postal 1311
Rio de Janeiro–Brazil.

Organizing Mexican's Association:
Dr: David Toledo Flores
Calle Carlos B: Zetina, 57
Mexico 18 DF Mexico

2nd Message of the Executive Secretary

Dear Colleague,

The first convention of the world Homoeopathic Medical Congress has decided that :—

(1) The 2nd Convention of the World Homoeopathic Congress will be held in MEXICO, September, 1960 with the official help of the Mexico Government in homage to the Mexico Homoeopathy.

(2) Has approved the regulations of that meeting, which have been published in Portuguese, French and English in the 'A Voz da Homoeopatia' number 69 of the first semester of 1955.

(3) The programme of the 2nd Convention to be held in Mexico, will be known by the whole world by means of the next edition of 'A Voz da Homoeopatia', n. 70 as well as in any Homoeopathic newspaper or magazine of the world. (We beg our colleagues to send any suggestion or help for the elaboration of our programme).

P. S. The 2nd Conventions of the W.H.M.C. will be officially held in MEXICO, September, 1960. The resolutions approved on the sessions, as well as official invitations will be transmitted from Government to Government by Mexico Government. You do remember how successful was the first Congress of the WHMC and we are sure to have the same success for the second. We hope to have special rates for the trip for you, your family and friends. The Presiding Presidents of the W.H.M.C. will be all the Presidents of the Homoeopathics Organizations present at the Congress.

The Central Homoeopathic & Biochemic Association, Gwalior.

Meeting of the Executive Body of the Association held on May 22, 1959, at the residence of Dr. Phool Singh Tomar, Chandra Bhawan, Chitnis-ki-gote, Lashkar, to consider the resignations of Dr. Madho Singh Yaduvanshi, Vice-President and Dr. N.P. Singh, Secretary who have founded the association. Resignation of both the office-bearers are accepted with great regret. The following are elected unanimously on the posts vacated by the above foregoing persons :—

Vice-President —Dr. K.P. Verma.
Secretary —Dr. Amar Singh Raghuvanshi.

14th All India Homoeopathic Medical Conference, Kanpur.

It is announced with much pleasure that the Fourteenth All India Homoeopathic Medical Conference which was to be held at Allahabad in the month of Feb. 1959, will now be held at Kanpur on the 20th & 21st June, 1959.

Many distinguished guests and stalwarts of our system will grace the occasion. Many vital subjects relating to recognition of the system of medicine and registration of Homoeopaths in all the States of the Union and the uncalled for day to day interference by the State Governments into the working of the Homoeopaths' registration boards will be dealt with in the conference. There will be a discussion on the science of Homoeopathy in the conference in which celebrities of our system of medicine will participate.

An earnest appeal is made to every member of our profession, to those who are interested in this system of medicine and to patrons of Homoeopathy to attend the conference and make it successful.

A detailed programme will soon be furnished to all the Provincial branches of the A.I.H.M.A. Meanwhile enquiries can be made from Dr. K. N. Sinha, 27/10 Roti Godam, Kanpur, General Secretary of the reception committee.

General Secretary
All India Homoeopathic Medical Association.

Pollachi Division Homoeopathic Association.

Resolutions were adopted thanking the Madras Government for having afforded recognition to Homoeopathy, and

requesting the Government to start a Homoeopathic College with Hospital attached immediately, where will be available both the Degree Course which would train people in the M. B. B. S. Standard and a diploma short-term course to enable people to solve the problem of rural medical relief.

By another resolution the meeting expressed the view that all the associations in the Madras State should come under the banner of a single association, and that as there was already the Madras Presidency Homoeopathic Association which was doing good work for the past 25 years to popularise and develop Homoeopathy, there was no need for any other association in the State. It was also resolved to request the Madras Government to allow every homoeopath to stock one pound of mother tincture in each drug.

The meeting was also of the opinion that Homoeopathy should not be classified as an indigenous system but should be dealt with as an international one and an All India Council should be appointed to ensure uniform development in all the States, and separate State Councils formed with Homoeopaths as members, to deal with the problems relating to Homoeopathic education, training and registration.

—The Madras Homoeopathic Journal, April, 1959.

PRAKASH HOMOEOPATIC CHRITABLE DISPENSARY & LIBRARY (1951)

(AFFILIATED TO AND RECOGNISED BY THE RAJASTHAN HOMOEOPATHY ASSOCIATION (REGD.))

Founder & Consulting Physican :

Dr. CHANDRA PRAKASH

Dispensary hours - 8 a. m. to 9 a. m. **New Colony.**
5 p. m. to 7. p m. **JAIPUR.**

Poor patients are invited to derive benefit of free Homoeopathic treatment from the Charitable Dispensary.

Well-to-do patients are also invited to derive the benefit of Hemoeopathic treatment and to contribute towards the cost of the medicines, so that more and more poor patients can be served, with free medicines,

Interested students are also invited to take advantage of the free reading room of the library.

Physician in-charge : *Manager :*
Dr. T. S. CHOHAN. **K. CHARAN.**

"If a doctor or a group of doctors objects to laymen treating their own ailments or those of their kith and kin with harmless remedies, in the best and safest way possible, that is nothing but trade conservatism and a denial of the fundamental freedom to lead a healthy and happy life, and to be of service to others. No enlightened soul, no responsible Govt., union of responsible doctors, will deny this freedom to the educated individual. Kings had objected to the aspirations of progressive people to rule themselves. But the age of slavery and exploitation is fast dying out and freedom is dawning on humanity in general."

—Captain C. Oommen, M.B. & B.S. (I.M.S. Retd.)

—Homoeopathy & Comparative Medicine, April 1959.

Britain Black-lists 650 Drugs.

Sir John Charles, Chief Medical Officer to the Ministry of Health, London, has issued a Black List to the doctors of Britain's Health Services and hospitals, prohibiting the use of 650 medicines contained in the list, as they have been found to contain drugs of harmful nature.

Since the time of Hippocrates, the father of modern allopathic medicine, various proprietory drugs and patent remedies have been put in the open market, backed by the recommendation of the Medical profession, but very soon the Medical profession saw some drawbacks or dangers associated with their use and they were condemned to be replaced by some fresh discoveries which were praised to be superior to them and free from their bad effects. These new discoveries held the market for a period and were soon replaced by other still newer remedies, and thus goes on and on this cycle of fresh discoveries and discarding of the old ones. 650 of the patent and proprietory drugs have been black-listed now. We do not know when the wonder drugs of the present day, the antibiotics etc., will share the fate of these 650 drugs. Herein lies the superior merits of Homoeopathic medicines. The medicines, which were found to be effective in a disease several decades back, are as effective to-day and will remain so till eternity. They are harmless and can be dispensed even by the layman without fear of endangering the life of the patient or causing him the slightest harm.

—Homoeopathy & Comparative Medicine, April, 1959.

Dr. Sir William Osler (M.D. D.Sc. L.L.D. F.R.S; F.R.C.P.)—Highly esteemed medical authority and the author of the famous text book on medicine prescribed in the Medical Colleges, the world over says, "It is not as if our Homoeopathic brethren are asleep far from it, they are awake to the importance of the scientific study of disease. The original grievous mistake was ours to quarrel with our brothers over infinitesimals. It was a Most Unwise And Stupid Thing To Do."

—Athurasrama College Magazine

Dr. August Bier (A surgeon of international fame)—"A much greater obstacle to concilliation however is the large army of pretenders, frauds and incompetants in medical and lay circles which are dangling on the apron strings of Homoeopathy much to the disgust of the honest and scientifically trained Homoeopathic Physicians. There will cease to be a stimulus for the quack to exploit it by advertisement. Gold-Scheider once very truly remarked that Scientific Medicine Is Itself Responsible For Quackery by Neglecting Good Methods of Healing".

—Athurasrama College Magazine, April 1959.

Dr. Mason Good, M.D., F.R.S.—"Our medicines (Allopathic) are in the highest degree uncertain except indeed that they have destroyed more lives than war, pestilence and famine combined. My experience with Materia Medica has proved it the baseless fabric of an empty dream."

Dr. Less Templetan M.D.Ch.B , F.F.Hom. (England)—"In spite of the amazing advances made by the modern orthodox science, approach is basically wrong, or if not wrong, at least from the wrong angle. I believe that the law of similars is still the only law in medical therapeutics; that it is basically sound; that if the amount of work and money poured into present day research was used towards the perfection of the Homoeopathic Materia Medica, within a measurable time we would treat all disease (and I use it in its true sense Disease) with almost mathematical certainty of cure."

"No individual has done more good to the medical profession than Samuel Hahnemann."

—Dr. W. Osler, M.D., D.Sc., LL.D., F.R.S., F.R.C P.,
(Dean of Orthodox Medicine).

OBITUARY

One of our Life Members Shri Dwarkalalji Gupta breathed his last in the early hours of Monday the 8th June 1959. He died of sudden heart failure at his residence at Kotah.

He was a fine gentleman, a sincere friend, a prominent citizen, a silent Philanthropist, and his achievements and services in the history of Banking in Rajasthan will be always remembered with high regards. He was the General Manager of the Bank of Rajasthan Ltd., until his death. His untimely death has caused irrepairable loss to the Bank. He died in harness and he was active until his last breath. He was 58 years old at the time of his death.

The Rajasthan Homoeopathy Association condoles his sad demise and prays for the salvation of his soul. May he rest in peace and may God grant his wife, sons, daughters and other survivors, strength and courage enough to bear the unavoidable loss.
